16/ 8/ 4 CH MPEG4 Multiplex DVR

U S E R   M A N U A L

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION : TO REDUCE THE RISK OF
ELECTRIC SHOCK, DO NOT REMOVE
COVER (OR BACK). NO USER SERVICEABLE
PARTS INSIDE. REFER SERVICING TO
QUALIFIED SERVICE PERSONNEL.
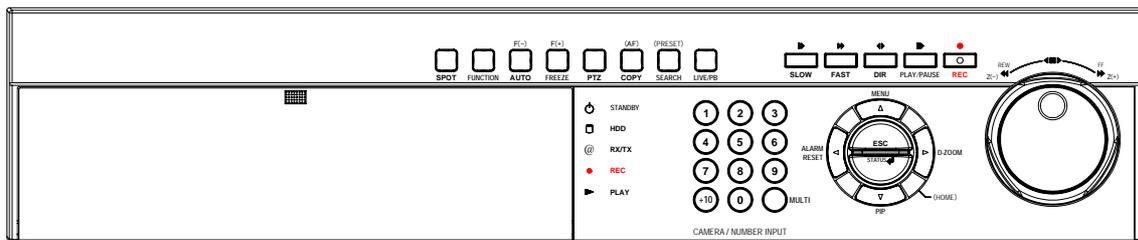

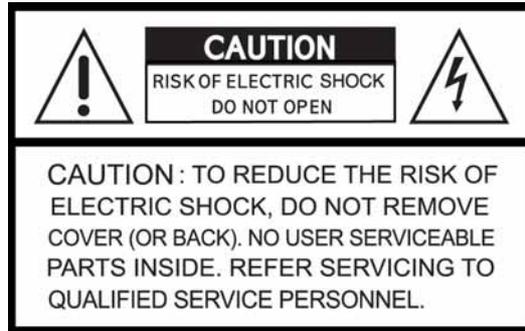

This symbol is intended to alert the user to the presence of unprotected "Dangerous voltage" within the product's enclosure that may be strong enough to cause a risk of electric shock.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

NOTE: This equipment has been tested and found to comply with the limits for a class digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Disposal of Old Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)

This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, please contact your local city office , your household waste disposal service or the shop where you purchased the product.

PRECAUTION

All the safety and operating instructions must be read before the unit is operated.

• Make sure to switch the power off before you install the DVR.

• There is the danger of an electric shock if the DVR is opened by an unqualified service engineer or installer.

• Avoid using the DVR outside of the reference temperature and humidity indicated in the specification.

• Avoid exposing the DVR to violent movement or vibration.

• Do not use or store the DVR in direct sunlight or near to any source of heat.

• Do not place any object into the holes used for air circulation.

• Always use the DVR in a well ventilated location to prevent overheating.

• Risk of explosion if battery is replaced by an incorrect type.

• Dispose of used batteries according to the instructions.

• When the system is overheated, the below warning message will be displayed at the monitor.

" SYSTEM IS OVERHEATED, TURN THE POWER OFF AND CHECK COOLING FAN" In this case, do the power off right away and check the cooling fan working.

• The HDD is recommended to use enhanced IDE Hard Disc Drive type made by Maxtor, Western Digital, Hitachi and IBM.

Chapter 1 Features

....

Operation

Playback, recording, backup and transmission simultaneously
Real time single or multi-screen display
Pan & Tilt, 2X/4X digital zoom and PIP display
Easy operation by Jog shuttle, IR remote controller, external keypad controller and
USB 2.0 Mouse
Hidden camera option (covert)
User-friendly setup menu and operation

....

Playback

Multi-screen playback (Full, Quad,4/ 9/16 split)
Search by date, time and camera
Preview window on event search mode
Playback mode(frame/ field) setup automatically

....

Recording

Select of the recording quality grade for each channel
Individual camera frame rate can be set by user
The recording speed of max.120 images per second (NTSC)
Manual, schedule and event recording
Pre & Post-alarm recording
Select of the recording image size for each channel
4 channels audio recording
Select of the event mode for each channel

....

Network

Live and playback viewing
Remote control on a networked PC with the exclusive client viewer
(The viewer software is supplied for free.)
Flexible connections - 10/ 100 Mbps Ethernet/ ADSL
Up to 16 network users access simultaneously
Audio transmission between DVR and Client
Dynamic IP is available

Audio

**4 channels audio recording in real time**

Copy

USB 2.0 external HDD
USB 2.0 memory stick
CD-RW/ DVD-RW (option)

General

Software downloading facility via network and USB memory stick
Auto detection of PAL / NTSC
Built-in hardware Watchdog
Automatic time adjustment through Network
VGA output for PC monitor(Option)
Optional Removable HDD,CD-RW or DVD-RW
Loop-through connections
**Graphic User Interface for the MENU screen**

Chapter 2 Packing Detail

Chapter 3 Location and Control

3.1 FRONT PANEL CONTROLS
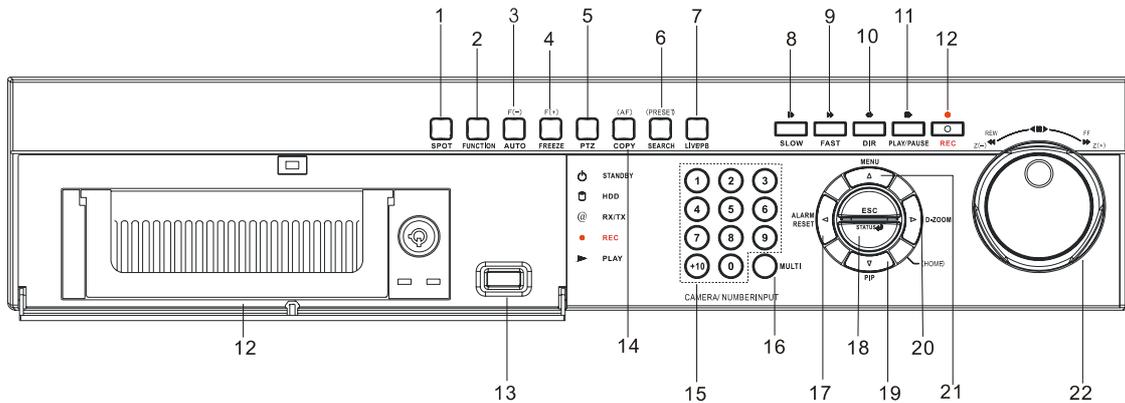

|	
1 SPOT / ESC	Button to control spot monitor/ return to the previous menu
2 FUNCTION	Using this button when you select "USER" in Relay 4
3 AUTO / F / (-)	Button to begin the auto sequence mode/ decrease the value/ focus in PTZ mode
4 LED Display	Display of the status of power(STANDBY), HDD(HDD) , network(RX / TX),REC,PLAY(PLAYBACK)
5 PTZ	Button to control PTZ camera
6 SEARCH(PRESET)	Button to display the search menu/ preset in PTZ mode
7 LV / PB	Button to convert the screen into real view mode or into playback mode
8 SLOW(�▶)	Button to slow down the playback speed
9 FAST(▶▶)	Button to speed up the playback speed
10 DIRECTION(◀▶)	Button to release the event signal/ move the left direction/ PAN left in PTZ mode
11 PLAY / PAUSE(▐▐▶)	Button to start the playback. If press again, a still picture is displayed during playback.
12 REC(●)	Button to begin and stop recording
13 R.HDD RACK	Removable HDD rack (Option: Built-in Removable HDD or CD-RW or DVD± RW)
14 USB port	USB 2.0 port to use a USB memory stick, Mouse or USB external devices
15 FREEZE / F / (+)	Button freeze image/ increase the value/ focus in PTZ mode
16 COPY(AF)	Button to display the copy menu/ automatically focus in PTZ mode
17 CHANNEL SELECT	Buttons to select the camera or input the password
18 MULTI	Multi-channel select button
19 ALARM RESET / ◀	Button to release the event signal/ move the left direction/ PAN left in PTZ mode
20 ↵ / STATUS/ (HOME)	Button to enter the next step/ display the status/ return to home position in PTZ mode
21 PIP / ⬇	Button to control PIP function/ move to the lower direction/ TILT down in PTZ mode
22 D-ZOOM / ➡	Button to control the digital zoom/ move to the right direction/ PAN right in PTZ mode
23 MENU / ⬆	Button to display the setup menu/ move to the upper direction/ TILT up in PTZ mode
24 JOG SHUTTLE	To make easy search in playback and menu setup/ control the playback speed/ control the zoom of PTZ camera

LOCATION AND CONTROL

3.2 REAR PANEL CONNECTORS
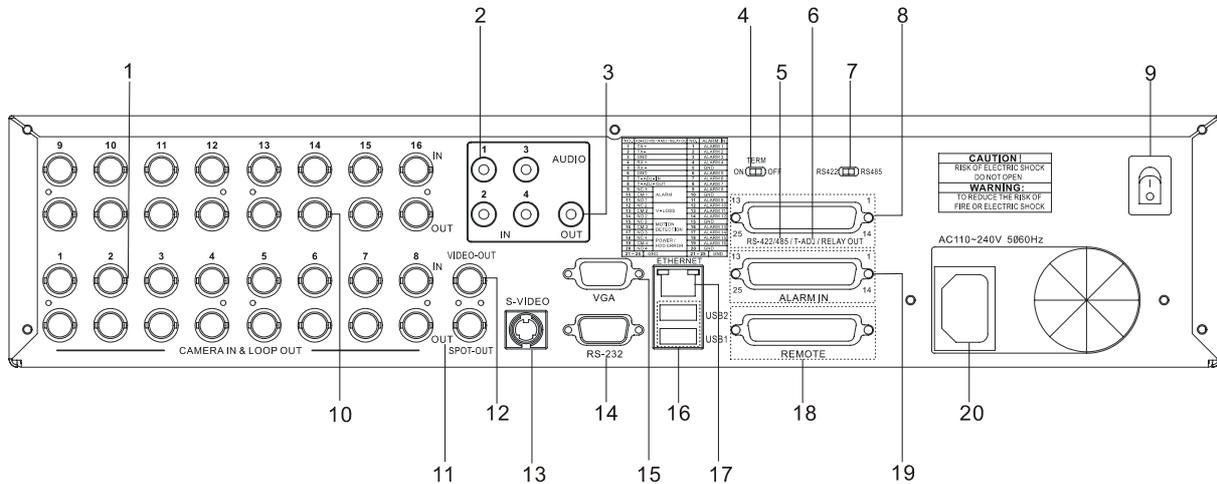

| Port Name	Description
1 CAMERA IN	BNC input ports for cameras
2 AUDIO IN	RCA input ports for an audio signal(4CH Line input)
3 AUDIO OUT	RCA output port for an audio signal
4 TERM ON / OFF	Switch to use the terminal block connectors of RS-422 or RS-485
5 T-ADJ	Input and output terminal blocks for time synchronization among DVR
6 RS-422 / 485	Terminal blocs of RS-422 or RS-485
7 422 / 485	Switch to convert into RS-422 or RS-485
8 RELAY OUT	4 relay output terminal blocks
9 POWER	POWER ON/OFF
10 CAMERA OUT	BNC output(looping) ports for cameras
11 SPOT OUT	BNC input port for spot monitor(Not used in all DVR models)
12 VIDEO OUT(Option)	BNC output port for the main monitor (Same as the RCA video output of the front panel)
13 S-VIDEO OUT	Connector for debugging. This DVR can be controlled by the other device through this connector(RS-232C).
14 SERIAL	Input and output terminal blocks for time synchronization among DVRs
15 VGA OUT	Output port for the VGA monitor This DVR is compatible with TFT LCD monitor in PAL mode.
16 ETHERNET	Port for 10/ 100Mbps Ethernet/ xDSL
17 USB1 / USB2	USB 2.0 ports to use USB memory stick, Mouse or the external devices
18 REMOTE	Reserved
19 ALARM IN	Input terminal blocks for alarm signals
20 POWER IN	Socket for a 220/ 110VAC power cord

8

Chapter 4 — Installation

4.1 TOTAL CONNECTION LAY-OUT
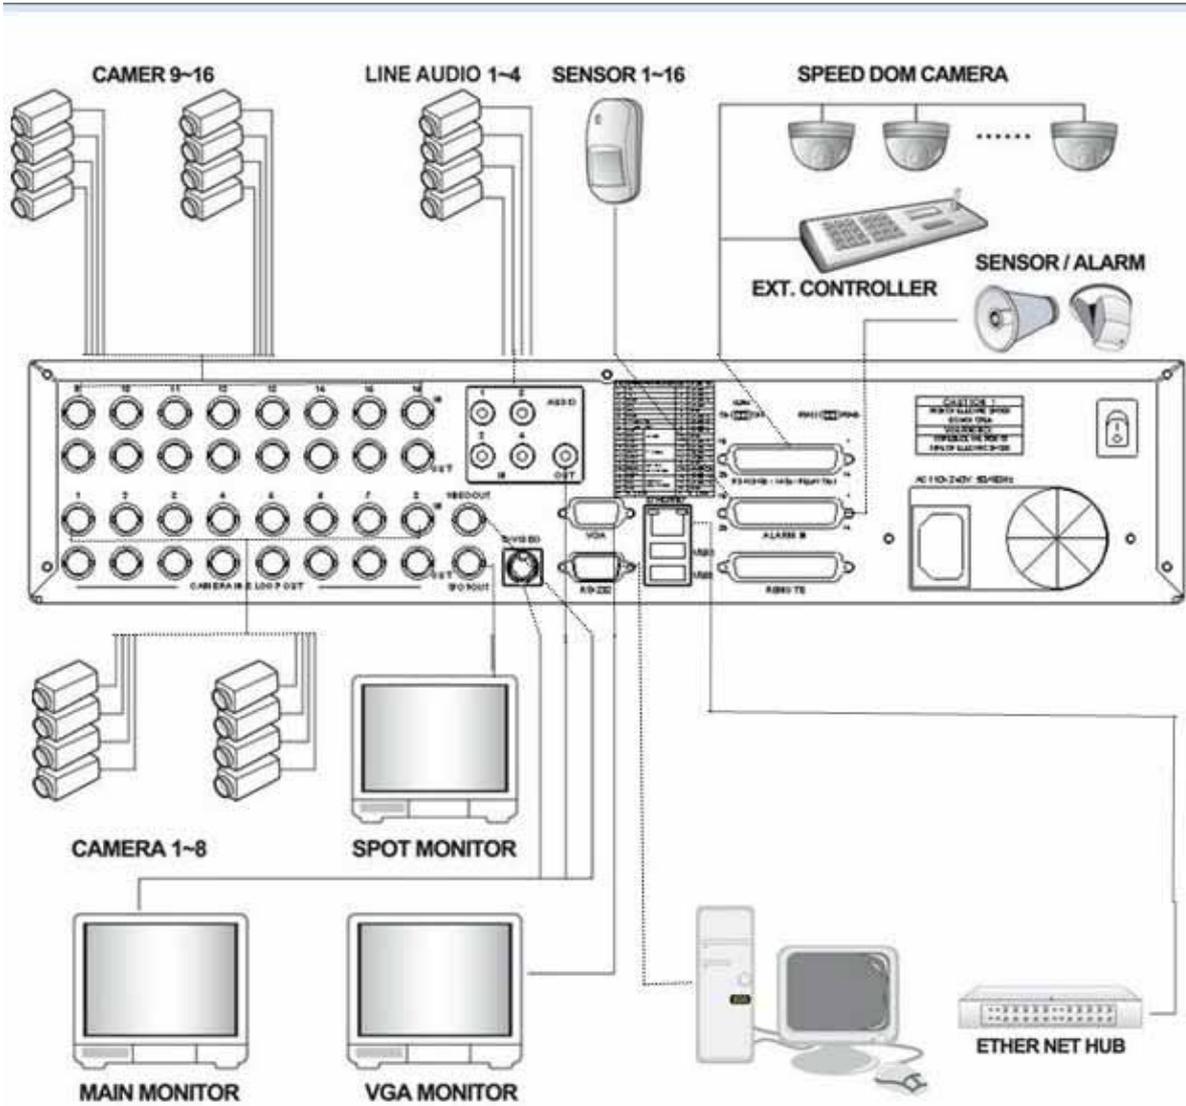

INSTALLATION

4.2 INDIVIDUAL CONNECTION

4.2.1 Camera
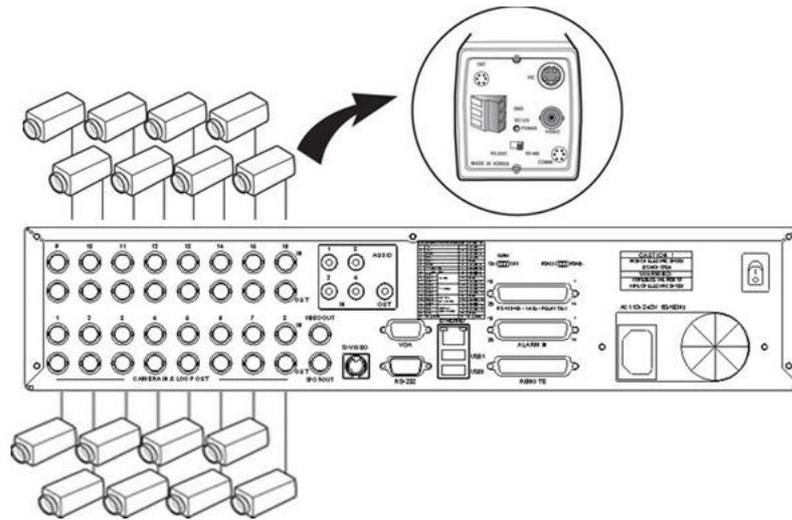

* Connect a female BNC connector of each camera to a male BNC connector, "CAMERA IN" port.
* Connect the looping BNC output to other inputs as required.

4.2.2 Audio (*Refer to the specification)
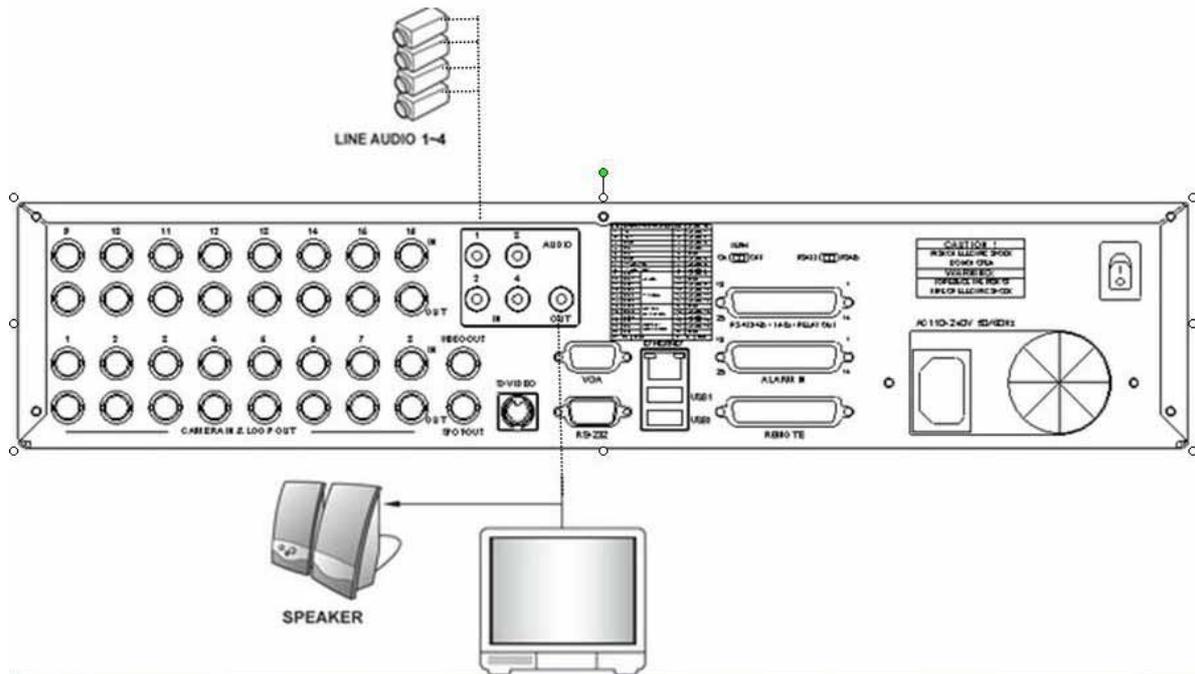

Audio Input
- AUDIO IN : Connect the RCA Line Jack of the relevant equipment (for example, a camera with a built-in microphone) to the AUDIO IN port.

Audio Output
- AUDIO OUT : Connect the RCA Line output to a monitor with a built-in speaker.

NOTE

This DVR can be connected only with a line audio and not support a microphone for audio input and output. To record audio should be enable in the AUDIO setup at the MENU setup.

As the audio is linked to a camera, it is required that linked camera viewed, either in multi-screen view during playback to hear the audio.

4.2.3 Monitor

SPOT MONITOR   MAIN MONITOR
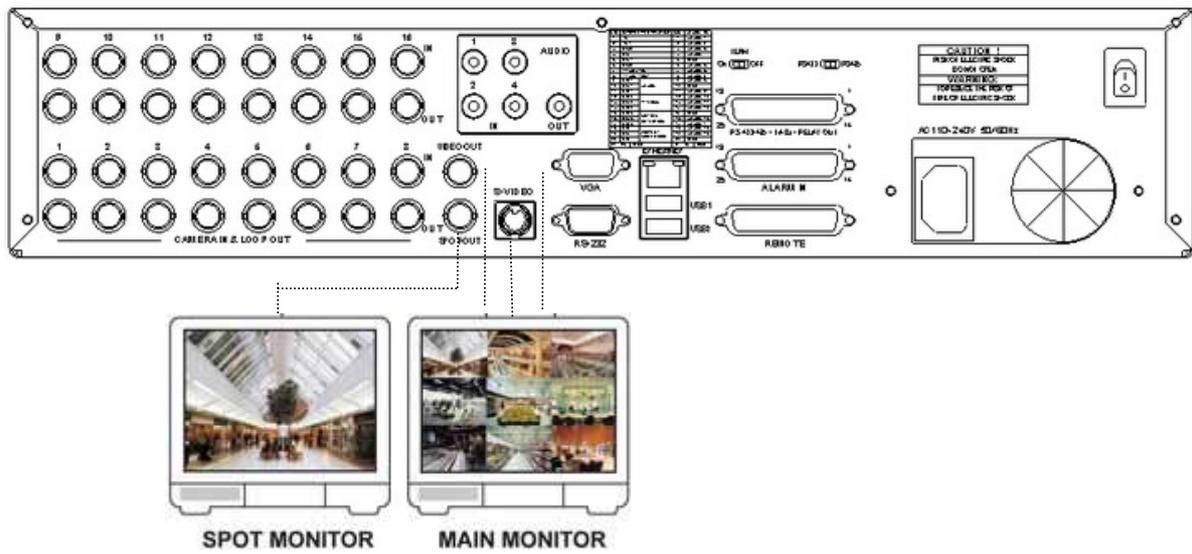

- Connect the female BNC for monitor output.
- Connect the male Y/C cable socket for S-VIDEO monitor output.

4.2.4 Power

CAUTION !
RISK OF ELECTRIC SHOCK
DO NOT OPEN
WARNING:
TO REDUCE THE RISK OF
FIRE OR ELECTRIC SHOCK

AC110~240V 50/60Hz
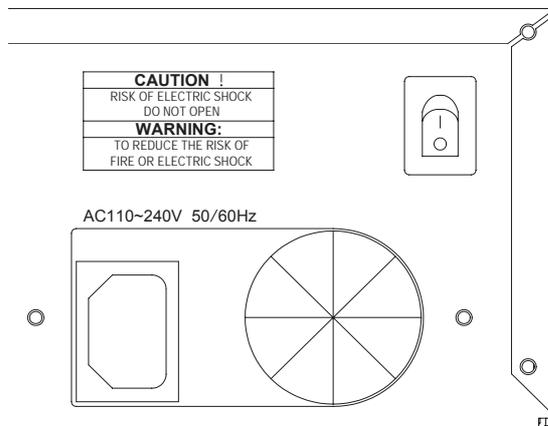

- Auto-detect the correct voltage of power (110~240 VAC)
- Connect the power cord.

4.2.5   USB 2.0 ports

1   Three USB ports are provided to connect a USB memory stick, external storage devices and CD-RW/DVD-RW for video clip copying. One USB port is on the front panel and the other two are on the rear panel.

2   A USB mouse can be connected to one of the ports. You can use the mouse to navigate through the screens and menus much like you would on a computer.

Installation Process

Connect the desired device to the DVR, as shown above.

(For example, USB memory stick, mouse, external storage device etc.)

Note: 1. Most USB memory stick brands are compatible, problem occurs only to some brands. Therefore, when data is unable to be achieved from the USB memory stick, please try again using other brands.

2. Most CD-RW disks are compatible using CD-RW device, problem occurs only to some brands. Therefore, when data is unable to be achieved from the CD-RW DVR, please try again using other brand CD-RW disks.

3. When compatibility problem occurs using DVD-RW device, please try again using other brand DVD-RW disks (CDs not supported: DVD-R, DVD+R, and DVD+RW).

5.2   FRONT PANEL CONTROLS

5.2.1   POWER ON/ OFF SWITCH(located in rear panel)
After the connection of power cord and other devices(HDDS) with this DVR, turn the power on.

POWER

a. The video signal system (NTSC or PAL) is automatically detected.
b. Power Failure Recovery
   This DVR automatically reverts back to programmed record parameters upon power restoration.
c. If the power key is protected by password, the power on/off cannot be executed before input the correct password.
   (Refer to the PASSWORD in the SYSTEM menu).

• If there is no video signal, the video signal system is set to NTSC. Do not input the PAL type video signal or it may
   cause the DVR's malfunction. In this case, turn off and on again.

5.2.2   SCREEN DISPLAY

5.2.2.1   Multi-Display & Full Screen display
a. Multi display
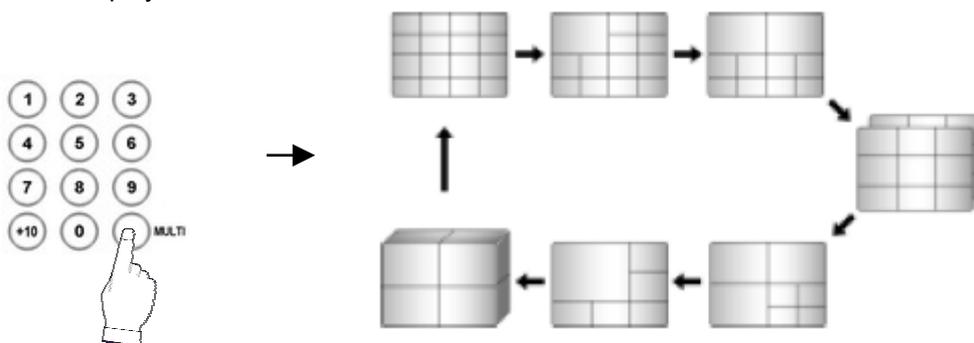

The example is display by 16CH DVR
To change a single camera display to the multi camera, press the MULTI button.

b. Full screen display

100% YYYY/MM/DD HH:MM:SS

CH1

Press the desired camera number button to display on the monitor.

Use the **+10 Button** when you select two digit camera numbers.
EX) Camera Number 12 **=** Press the **+10 Button**, and then press the No. **2 Button**.

CAMERA/NUMBER INPUT buttons are used to input the password in the password lock function.

5.2.2.2 Auto Sequence Display
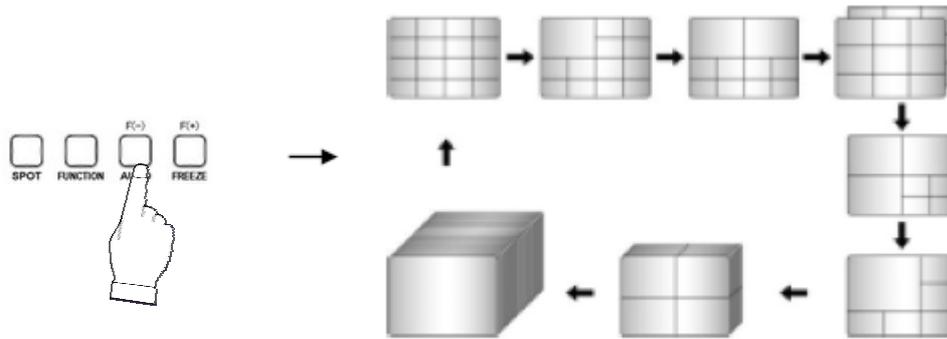

<ADD AUTO SINGLE : ON> example for 16CH

- Press the AUTO button, each screen display will be automatically switching according to the AUTO SEQUENCE setup.
- If you set up "ADD AUTO SINGLE : OFF" in the AUTO SEQUENCE setup menu, the single display will be skipped.
- To view the single display, set up "ADD AUTO SINGLE : ON" in the AUTO SEQUENCE setup menu and the single display will be included in the auto sequence display.
- Press the AUTO button again to exit the AUTO mode.

If an event takes place, the AUTO SEQUENCE mode will be cancelled.
Please refer to the AUTO SEQUENCE of Chapter 6 MENU setup for more information.(Page 40)

5.2.2.3 Freeze
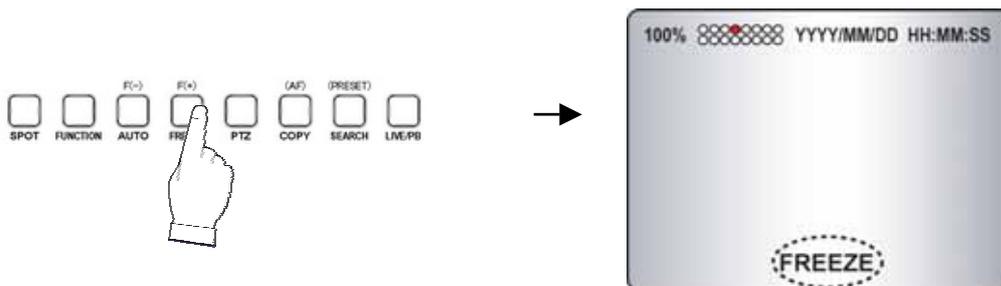

MULTI SCREEN MODE
At the Multi display mode, press the FREEZE button and then select the desired camera number.
Press the FREEZE button again to release the FREEZE mode.

SINGLE SCREEN MODE
Press the FREEZE button after the desired channel is selected.
Press the FREEZE button again to release the FREEZE mode.

- If you press the MULTI button after pressing the FREEZE button, all the channels will display still images.
- FREEZE function is not available, when auto mode is selected.
  (Refer to AUTO SEQUENCE in the SCREEN menu for further information)

5.2.3 RECORD

Press the REC button and the following message will be displayed as below;
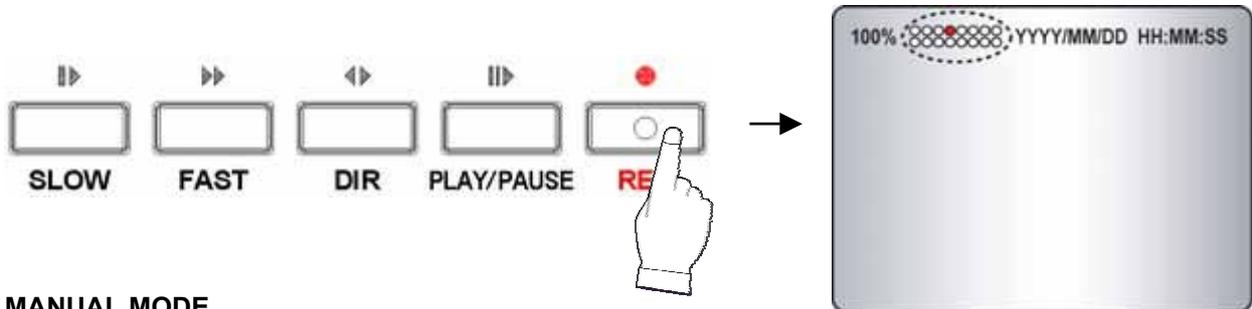

MANUAL MODE
Press the REC button to begin recording.
To stop recording, press the REC button again. The screen will be turned into real time display mode.

SCHEDULE MODE
When Schedule mode is selected, the recording will be automatically executed according to the recording schedule. (Please refer to the RECORD PROGRAM in the RECORD setup, page 47.)

The color of record indication ( ) on the screen will be changed according to the type of recording and refer to the following.

- " (Yellow) " : Manual recording status.

- " (Green) " : Schedule recording status.

- " (Red) " : Event recording status. (Motion detection/ Video loss/ Sensor)

- " (White) " : Not recording.

All channels will be displayed by red lights even if an event happened just on one channel. Red light will be displayed because this unit enters the event record mode when event happened. If a channel has an event, all channels will be recorded by event recording frame rate to be set in RECORD PROGRAM menu.

5.2.4 SEARCH & PLAYBACK

Press the **SEARCH** button, the SEARCH menu screen appears.
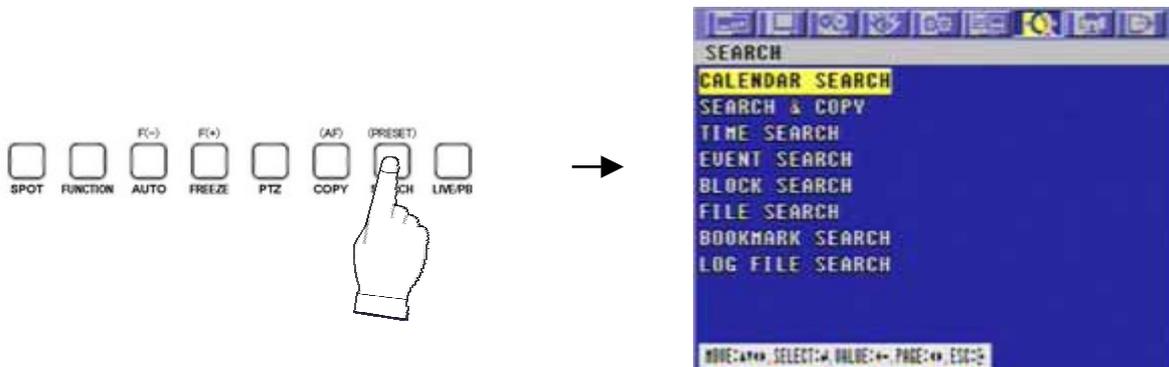

If you press the PLAY button in the real time screen mode, playback will be executed from the end of the previous time search and press the desired channel select button.
To exit the playback mode and see the live screen again, press LV/PB button.

5.2.4.1 CALENDAR SEARCH

At the SEARCH menu;

Move the cursor to **CALENDAR SEARCH** using ⬆ or ⬇ button.

Press the ENTER button and CALENDAR SEARCH screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to CHANNEL using the ⬆ or ⬇ button and select the desired channel using the (-) or (+) button.

Move the cursor to the desired position using the ⬆ , ⬇ , ⬅ , ➡ buttons, and then select the desired date.

Press the ENTER button, and the following screen appears.

Move the cursor to the desired position of during HOUR, MIN and SEC using the ⬆ , ⬇ , ⬅ , ➡ buttons, and select the desired time using the (-), (+) buttons.

Press the ESC button to exit this menu.

5.2.4.2   SEARCH & COPY

At the SEARCH menu;

Move the cursor to **SEARCH & COPY** using ⬆ or ⬇ button.

Press the ENTER button and SEARCH & COPY screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to CHANNEL using the ⬆ or ⬇ button and select the desired channel using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the ⬆ , ⬇ , ⬅ , ➡ buttons, and then set up the desired time using the(-), (+) buttons or turn the wheel scroll of mouse to set the search time.

Press the ENTER button and you can playback.

Move the cursor to START COPY and then press the ENTER button to copy.

Press the ESC button to exit this menu.

5.2.4.3   TIME SEARCH

At the SEARCH menu;

Move the cursor to TIME SEARCH using ⬆ or ⬇ button.

Press the ENTER button and TIME SEARCH screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to CHANNEL using the ⬆ or ⬇ button and select the desired channel using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the ⬆ , ⬇ , ⬅ , ➡ buttons, and then set up the desired time using the(-), (+) buttons or turn the wheel scroll of mouse to set the search time.

Press the ENTER button and you can playback.

Press the ESC button to exit this menu.

5.2.4.4   EVENT SEARCH

At the SEARCH menu;

Move the cursor to EVENT SEARCH using ⬆ or ⬇ button.

Press the ENTER button and the EVENT SEARCH menu screen appears.
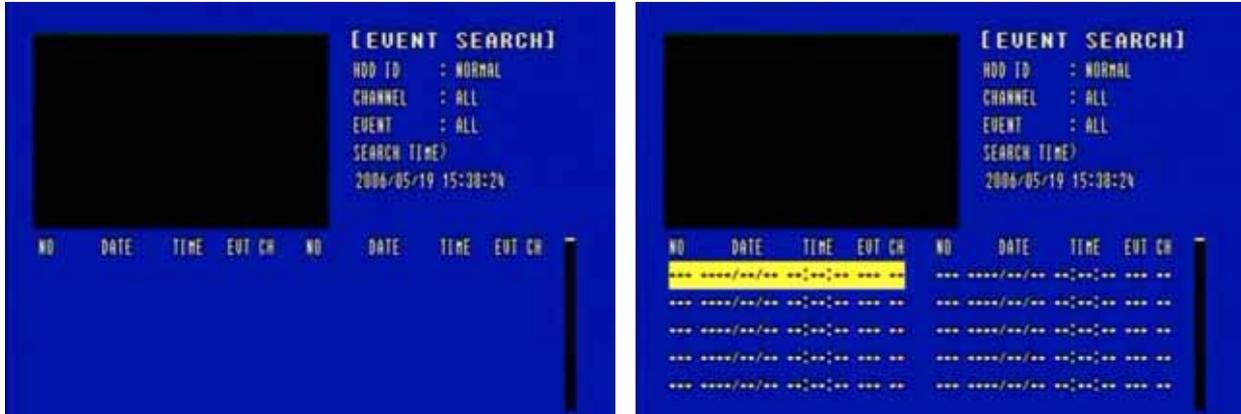

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to CHANNEL using the ⬆ or ⬇ button and select the desired channel using the (-) or (+) button.

Move the cursor to EVENT using the ⬆ or ⬇ button and select the event type to search using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the ⬆ , ⬇ , ⬅ , ➡ buttons, and then set up the desired time using the(-), (+) buttons.

(Or turn the wheel scroll of mouse to search the event list.)

Press the ENTER button or turn the wheel scroll of mouse, and the event list searched appears.

When the event list appears on the screen, select the desired list using ⬆ or ⬇ buttons or wheel scroll of mouse and press the ENTER button for the playback.

- When video loss is detected, up to five seconds of **pre-recording** data is stored on the HDD and the details will be listed in the EVENT LIST. The beep sounds and the LED of the ALARM RESET button will flicker. Press the ALARM RESET button to remove this signal.
- When the unit receives a signal from the sensor input, DVR begins to record the input data according to the PRE/POST TIME in the RECORD setup and the details will be listed in the EVENT LIST.

CAUTION

If the internal HDD(s) is initialized, all of the event images will be deleted.

When the unit is in normal recording status, the pre-recording will not be executed.

5.2.4.5   BLOCK SEARCH

At the SEARCH menu;

Move the cursor to BLOCK SEARCH using ⬆ or ⬇ button.

Press the ENTER button and the BLOCK SEARCH menu screen appears.

Select the desired HDD ID using the (-) or (+) button.

Move the cursor to the desired position of SEARCH TIME using the ↑ , ↓ , ← , ➡ buttons, and then set up the desired time using the(-), (+) buttons. (Or turn the wheel scroll of mouse to search the block list.)

Press the ENTER or turn the wheel scroll of mouse, and the list searched appears.

When the list appears on the screen, select the desired list using ↑ or ↓ buttons or wheel scroll of mouse and press the ENTER button for the playback.

5.2.4.6 FILE SEARCH
At the SEARCH menu;

Move the cursor to FILE SEARCH using ↑ or ↓ button.

Press the ENTER button and the FILE SEARCH screen appears.
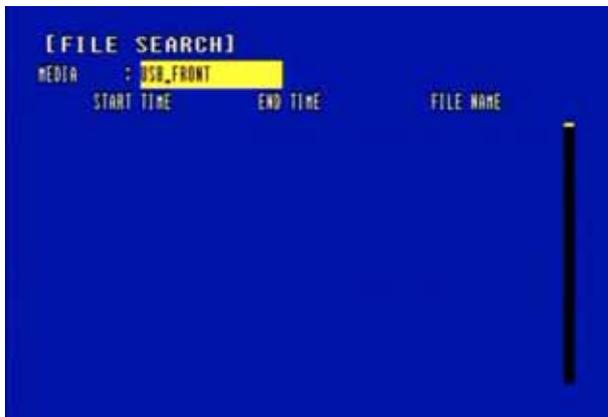

Select the desired type of MEDIA using the (-) or (+) button.

Press the ENTER button or turn the wheel scroll of mouse, and the list searched appears.

When the list appears on the screen, select the desired list using ↑ or ↓ buttons or wheel scroll of mouse.

Press the ENTER button for the playback.

5.2.4.7 BOOKMARK SEARCH
At the SEARCH menu;

Move the cursor to BOOKMARK SEARCH using ↑ or ↓ button.

Press the ENTER button and the BOOKMARK SEARCH screen appears.

Press the ENTER button, and the list searched appears.
When the list appears on the screen, select the desired list using ⬆ or ⬇ buttons or wheel scroll of mouse
Press the ENTER button for the playback.
<How to make Bookmark list>
Press the "PB/PAUSE" button to playback.
Find the desired image using shuttle ring.
Press the "PB/PAUSE" button to see the still picture of the desired image.
Press the "PTZ" button to add the BOOKMARK list.

5.2.4.8   LOG FILE SEARCH
At the SEARCH menu;
Move the cursor to LOG FILE SEARCH using ⬆ or ⬇ button.
Press the ENTER button and the LOG FILE SEARCH screen appears.
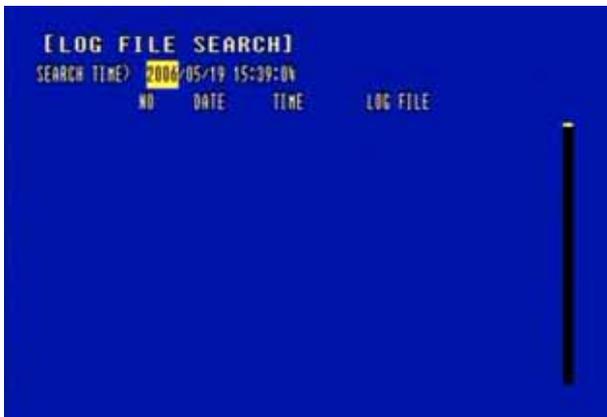

Move the cursor to the desired position of SEARCH TIME using the ⬆ , ⬇ , ⬅ , ➡ buttons, and then set up the desired time using the(-), (+) buttons.
(Or turn the wheel scroll of mouse to search the desired list.)
Press the ENTER button or turn the wheel scroll of mouse, and the list searched appears.
When the list appears on the screen, select the desired list using ⬆ or ⬇ buttons or the wheel scroll of mouse.

5.2.5   SEARCH BUTTON INFORMATION
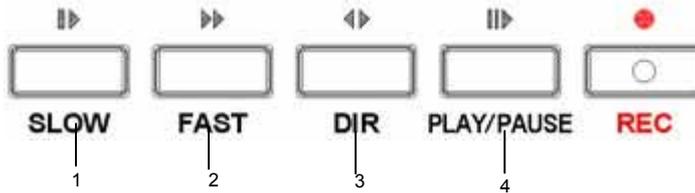

5.1.5.1   SLOW (▐►)

Press this button to make the speed level which is slower than normal speed (X1) and displayed it at the upper left side of screen as below;
(If you press this button again, the playback speed will be changed in the order of the below seven speed level)

i.   ▐► 1/2 - 2 times slower than normal playback speed
ii.   ▐► 1/4 - 4 times slower than normal playback speed
iii. ▐► 1/8 - 8 times slower than normal playback speed
iv. ▐► 1/16 - 16 times slower than normal playback speed
v.   ▐► 1/32 - 32 times slower than normal playback speed
vi. ▐► 1/64 - 64 times slower than normal playback speed
vii. ▐► 1/128 - 128 times slower than normal playback speed

5.2.5.2   PLAY / PAUSE   (▐▐►   )

Press this button to begin playback at normal speed (X1).
Press this button again to pause the playback.

> **NOTE**
> If you press the "PLAY/ PAUSE" button to playback, it will playback from the end of played final image.

<How to playback a section repeatedly>

Use the ↑ , ↓ , ← , → buttons to move the cursor to the desired item.
Select the desired RECORD TYPE using the (-), (+) buttons or wheel scroll of mouse.

- **SINGLE** : Only one event channel will be recorded by setting event recording frame rate and the other channels will be recorded by rest event recording fps/N(channel number) when an event happened. For example, if you connect 16 cameras and set EVENT RECORD of all channels to "30", one event channel will be recorded by 30 ips and the other channel will be recorded by 90(Max. 120 – 30)/15 = 6 ips.
You can set the more recording frame rate for one channel.
(This type is good for the place where the event is rarely happened.)

- **COMPLEX** : All event channels will be recorded by max. event recording frame rate/N(channel number) when the event happened.
For example, if you connect 16 cameras and set EVENT RECORD of all channels to Max. frame rate, 120, 16 each channel will be recorded by 120/N = 7 ips.
(This type is good for the place where the event is often happened.)

< Result table of total frame rate >

Record Type	Image Size	Normal Record	Event Record		Unit
			Event Channel	Other Channel	
Single	360 x 240	Normal Frame	ES_Frame	RS_Frame	CIF/1 SEC
	720 x 240	Normal Frame	ES_Frame	RS_Frame	CIF/1 SEC
	720 x 480	Normal Frame	ES_Frame	RS_Frame	CIF/1 SEC
Complex	360 x 240	Normal Frame	EC_Frame	EC_Frame	CIF/1 SEC
	720 x 240	Normal Frame	EC_Frame	EC_Frame	CIF/1 SEC
	720 x 480	Normal Frame	EC_Frame	EC_Frame	CIF/1 SEC

- ES_Frame : Event single frame rate.
- EC_Frame : Event complex frame rate.
- RS_Frame : Remain single frame rate = (Max. Frame Rate – ES_Frame) / 15.

Select the desired RECORDING INTERVAL using the (-), (+) buttons or wheel scroll of mouse.
RECORDING INTERVAL means at what-second intervals you want to record.
If you set "RECORDING INTERVAL" to "1SEC", each channel will be recorded by setting frame rate per "1SEC".
Set the IMAGE SIZE of each channel using the (-), (+) buttons or wheel scroll of mouse. There are the 3 types of 720x480(D_1), 720x240(Half-D_1) and 360x240(CIF).
* The default is 720x240.
You can set the frame rate of each channel using the (-), (+) buttons or wheel scroll of mouse.
- **N** : Frame rate for normal recording
- **E** : Frame rate for event recording
Set the IMAGE QUALITY for normal recording and for event recording of each channel using the (-), (+) buttons or wheel scroll of mouse.
There are 3 types, Fine(F)/ Superfine(S)/ Low(L).
Set the PRE TIME and POST TIME using the (-), (+) buttons or wheel scroll of mouse. When the event is detected, the DVR will store pre- and post-recorded data during the selected period.

The value of "PRE TIME" is from 0 to5 seconds and the value of "POST TIME" is from 0 to 60 seconds.
The default of pre-recording time is 5 seconds and post-recording is 10 seconds.
Note: The pre- and post- recording is not valid in normal recording mode.

Choose the type of the EVENT using the (-), (+) buttons or wheel scroll of mouse and ↑ , ↓ , ← , ➡ buttons if you want the event recording(Motion detection/ Video loss/ Alarm) or not. "O" means that the event recording is "ON" and "-" means that the event recording is "OFF".

< PROGRAM DEFAULT>
These are 10 kinds of program and you can change the program setting.

6.3.3 IMAGE QUALITY

At the RECORD menu,
   Move the cursor to the IMAGE QUALITY using ⬆ , ⬇ buttons.
   Press the ENTER button when the cursor is on the IMAGE QUALITY and the following screen
   appears.
NOTE: This function is only operative, when the recording condition is OFF.

   Select the desired RECORD QUALITY using the (-), (+) buttons or wheel scroll of mouse.
   And you can see the size of each image quality and how long you can record in the installed
   HDDs by the image quality.
   To exit this IMAGE QUALITY menu, press the ESC button.

NOTE
RECORD TIME: A period how long you can record in free space of installed HDD(s) by setting of Max. frame rate.
TOTAL TIME: A period how long you can record in total installed HDD(s) by setting of Max. frame rate.
** The better the image quality is, the bigger the file size is and the worse the image quality, the smaller the file size is.

6.3.4   AUDIO RECORD

At the RECORD menu,
Move the cursor to the AUDIO RECORD using the ↑ , ↓ buttons.
Press the ENTER button when the cursor is on the AUDIO RECORD and the following screen appears.

Select the recording channel for each audio channel using the (-), (+) buttons or wheel scroll of mouse.

NOTE : 16CH   8CH   4CH DVR has 4CH Audio inputs.

6.3.5   REPEAT RECORD

At the RECORD menu,
Move the cursor to the REPEAT RECORD using ↑ , ↓ buttons.
Press the ENTER button when the cursor is on the REPEAT RECORD and the following screen appears.

Use the (-), (+) buttons or wheel scroll of mouse to set "ON" or "OFF".

It is possible to set a point of time to work the REPEAT RECORD ALARM.

Move the cursor to "REPEAT RECORD ALARM" using ⬆ , ⬇ buttons and then select the desired value using (-), (+) buttons or wheel scroll of mouse.

The value is from 5% to 10%.

To exit this REPEAT RECORD menu, press the ESC button.

ON: The recorded data will be overwritten when it is a point of time to work the REPEAT RECORD. REPEAT RECORD ALARM is the rest capacity of the HDD.

If you set "REPEAT RECORD ALARM" to 5%, alarm will work when the rest capacity of the HDD is 5%.

6.3.6 PLAY MODE

At the RECORD menu,

Move the cursor to the PLAY MODE using ⬆ , ⬇ buttons.

Select the PLAY MODE using the (-), (+) buttons or wheel scroll of mouse.

FRAME : It will playback images in frame mode which is useful for recorded images in high frame rate. This may occur moving artifact with recorded images in low frame rate.
FIELD : It will playback images in field mode. This reduces the resolution, but is suitable for recorded images in low frame rate.

6.3.7 BACKUP MODE

At the RECORD menu,

Move the cursor to the "BACKUP MODE" using ⬆ , ⬇ buttons.

Select the "BACKUP MODE" using the (-), (+) buttons or wheel scroll of mouse.

EVENT: Backup only when the event occurs.
MIRROR : Recording the same images in backup HDD.
OFF   : Not backup.

6.3.8 HOLIDAY

At the RECORD menu,

Move the cursor to the "HOLIDAY" using ⬆ , ⬇ buttons.

Press the "ENTER" button to set up "HOLIDAY" and the HOLIDAY menu screen appears.

Set up "ON" or "OFF" of HOLIDAY RECORD using the (-), (+) buttons or wheel scroll of mouse.
Move the cursor using ⬆ , ⬇ buttons and set up the value using the (-), (+) buttons or wheel scroll of mouse.
To exit this HOLIDAY menu, press the ESC button.

6.4   EVENT

To set up the EVENT menu,
Move the cursor to the EVENT icon using the ⬅ , ➡ in the MENU screen.
Press the ENTER button when the cursor is on the EVENT icon and the following items appear.

6.4.1   MOTION DETECTION

At the EVENT menu,
Move the cursor to the MOTION DETECTION using ⬆ , ⬇ buttons.
Press the ENTER button when the cursor is on the MOTION DETECTION and the following screen appears.

6.4.1.1 CHANNEL
At the MOTION DETECTION menu,
Move the cursor to CHANNEL using ⬆ , ⬇ buttons.
Select the desired channel using the (-), (+) buttons or wheel scroll of mouse.
Under Event option, move the cursor to the EVENT MESSAGE using ⬆ , ⬇ buttons.
Select "ON" or "OFF" using the (-), (+) buttons or wheel scroll of mouse.

6.4.1.2 SENSITIVITY
At the MOTION DETECTION menu,
Move the cursor to SENSITIVITY using ⬆ , ⬇ buttons.
Select the sensitivity level using the (-), (+) buttons or wheel scroll of mouse.

> SENSITIVITY: The higher the number is, the more sensitive. 1(lowest) ~ 5(highest)

6.4.1.3 AREA SETUP
At the MOTION DETECTION menu,
Move the cursor to AREA SETUP using ⬆ , ⬇ buttons.
Press the ENTER button to set the motion detection area.
Select the motion detection area using the ⬆ , ⬇ , ⬅ , ➡ buttons and then press the ENTER
button to save the area.
Turn the shuttle ring to the right to select all cells for motion detection and turn the shuttle ring to
the left to reset all area.
To exit this AREA SETUP, press the ESC button.

> Mouse operation:
> Enable Cell Setup by Mouse: Left button click (without releasing the button) and drag from the left
> top to the right bottom cell.
> Disable Cell Setup by Mouse: Right button click (without releasing the button) and drag from the
> left top to the right bottom cell. AREA SETUP GRID: 30 x 24

6.4.1.4 TEST MOTION
At the MOTION DETECTION menu,
Move the cursor to TEST MOTION using the ⬆ , ⬇ buttons.
Press the ENTER button to test the motion detection.
To exit this TEST MOTION, press the ESC button.

6.4.2 EVENT SCREEN MODE

At the EVENT menu,
Move the cursor to the EVENT SCREEN MODE using ⬆ , ⬇ buttons.
Select the EVENT SCREEN MODE using the (-), (+) buttons or wheel scroll of mouse.

> SCREEN HOLD: Keeping the current screen even if the event occurs.
> EVENT FULL　: Display the full screen of the channel which the event occurs.
> EVENT MULTI : Display the multi-screen when the event occurs.

6.4.3 EVENT CHECK

At the EVENT menu,
Move the cursor to the EVENT CHECK using ⬆ , ⬇ buttons.
Select "ON" or "OFF" using the (-), (+) buttons or wheel scroll of mouse

6.4.4 EVENT MESSAGE

At the EVENT menu,
    Move the cursor to the EVENT MESSAGE using ⬆ , ⬇ buttons.
    Select "ON" or "OFF" using the (-), (+) buttons or wheel scroll of mouse

> ON: The warning message will be displayed when the event occurs.

6.4.5 EVENT MESSAGE RESET

At the EVENT menu,
    Move the cursor to the EVENT MESSAGE RESET using ⬆ , ⬇ buttons.
    Set the time to reset the event message from 1SEC to 30SEC using the (-), (+) buttons or wheel scroll of mouse.

6.4.6 EVENT BUZZER

At the EVENT menu,
    Move the cursor to the EVENT BUZZER using ⬆ , ⬇ buttons.
    Select "ON' or "OFF" using the (-), (+) buttons or wheel scroll of mouse to set the event buzzer.

6.4.7 SENSOR INPUT

At the EVENT menu,
    Move the cursor to the SENSOR INPUT using the ⬆ , ⬇ buttons.

    Press the ENTER button when the cursor is on the SENSOR INPUT and the following 2 pages screen appears.
    Select the desired channel using the ⬆ , ⬇ buttons.
    Select the type of sensor which is connected with DVR using the (-), (+) buttons or wheel scroll of mouse.
    To exit this SENSOR INPUT menu, press the ESC button.

> Select the right sensor type according to the type of installed sensor with the unit.
> NORMAL OPEN   : The sensor is open in normal times.
> NORMAL CLOSE : The sensor is close in normal times.
> NOT USED: No sensors are connected to the DVR unit

6.5   SYSTEM

To set up the SYSTEM menu,
Move the cursor to the SYSTEM icon using the ◀ , ▶ in the MENU screen.
Press the ENTER button when the cursor is on the SYSTEM icon and the following items appear.

6.5.1   HDD

At the SYSTEM menu,
Move the cursor to the HDD using the ⬆ , ⬇ buttons.
Press the ENTER button when the cursor is on the HDD and the following screen appears.

To exit this HDD menu, press the ESC button.

6.5.1.1   HDD CONFIGURATION
At the HDD menu,
Move the cursor to HDD CONFIGURATION using the ⬆ , ⬇ buttons.
Press the ENTER button when the cursor is on the HDD CONFIGURATION and the following screen appears.

Use the ⬆ , ⬇ , ⬅ , ➡ buttons to move the cursor and use the (-), (+) buttons or wheel scroll of mouse to change the value.

HDD MODE
- REC: Normal and Event recording
- BACKUP: Only for backup

6.5.1.2   REC HDD INITIALIZE
At the HDD menu,
Move the cursor to REC HDD INITIALIZE using the ⬆ , ⬇ buttons.
Press the ENTER button when the cursor is on the REC HDD INITIALIZE and the following screen appears.

If you want to initialize, move the cursor to "YES" and then press the "ENTER" button. If not, move the cursor to "NO" and then press the "ENTER" button.
To exit this screen, press the ESC button.
To exit this HDD menu, press the "ESC" button again.

6.5.1.3   BACKUP HDD INITIALIZE
At the HDD menu,
Move the cursor to "BACKUP HDD INITIALIZE" using the ⬆ , ⬇ buttons.
Press the "ENTER" button when the cursor is on the "BACKUP HDD INITIALIZE" and the following screen appears.

58

If you want to initialize, move the cursor to "YES" and then press the ENTER button. If not, move the cursor to "NO" and then press the ENTER button.
To exit this screen, press the ESC button.
To exit this HDD menu, press the "ESC" button again.

6.5.2   CLOCK

At the SYSTEM menu,
  Move the cursor to the CLOCK using the ⬆ , ⬇ buttons.
  Press the ENTER button when the cursor is on the CLOCK and the following screen appears.

6.5.2.1   DATE&TIME
At the CLOCK menu,
  Move the cursor to the DATE&TIME using the ⬆ , ⬇ buttons.
  Press the ENTER button when the cursor is on the DATE&TIME and the following screen appears.

Use the ⬆ , ⬇ , ⬅ , ➡ buttons to move the cursor to the desired position of date or time.

Use the (-), (+) buttons or wheel scroll of mouse to modify the current date and time.
- DATE: YYYY/MM/DD   YEAR/MONTH/DAY
- TIME : HH:MM:SS   HOUR:MINUTE:SECOND

To exit this DATE & TIME screen, press the ESC button.

6.5.2.2 TIME ADJUST
At the CLOCK menu,

Move the cursor to the TIME ADJUST using the , buttons.

Press the ENTER button when the cursor is on the TIME ADJUST and the following screen appears.

Select "ON" or "OFF" using the (-), (+) buttons or wheel scroll of mouse when the cursor is on "INTERNET TIME ADJUST". If the INTERNET TIME ADJUST is "ON", the time of DVR will be adjusted to the time offered by the internet server.

Move the cursor using the ⬆ , ⬇ , ⬅ , ➡ buttons and then set the IP address of SELECT TIME SERVER using the (-), (+) buttons or wheel scroll of mouse.

Set the correct TIME ZONE standardizing GMT(Greenwich Mean Time).

Move the cursor to the DAYLIGHT SAVING TIME(Summer time) using the ⬆ , ⬇ buttons and then select "ON" or "OFF" using the (-), (+) buttons or wheel scroll of mouse.

If the DAYLIGHT SAVING TIME set "ON", set up the starting date and time and end date and time. Use the ⬆ , ⬇ buttons to move the cursor and use the (-), (+) buttons or wheel scroll of mouse to change the value.

To exit this TIME ADJUST menu, press the ESC button.

6.5.3   PASSWORD
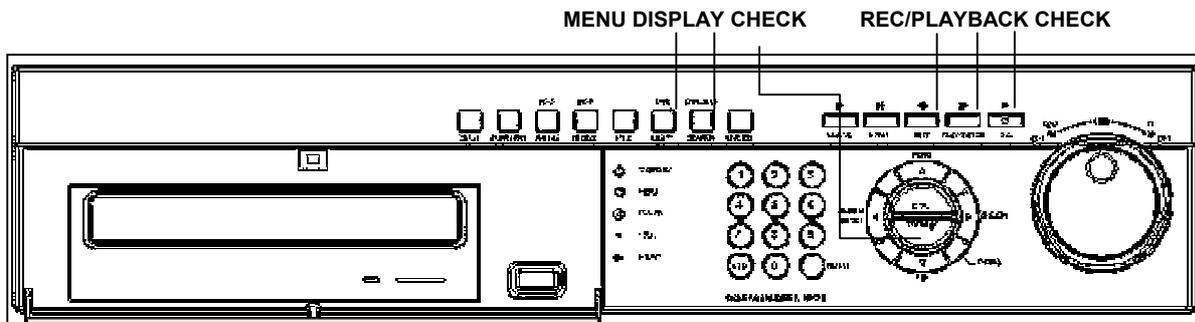

MENU DISPLAY CHECK   REC/PLAYBACK CHECK
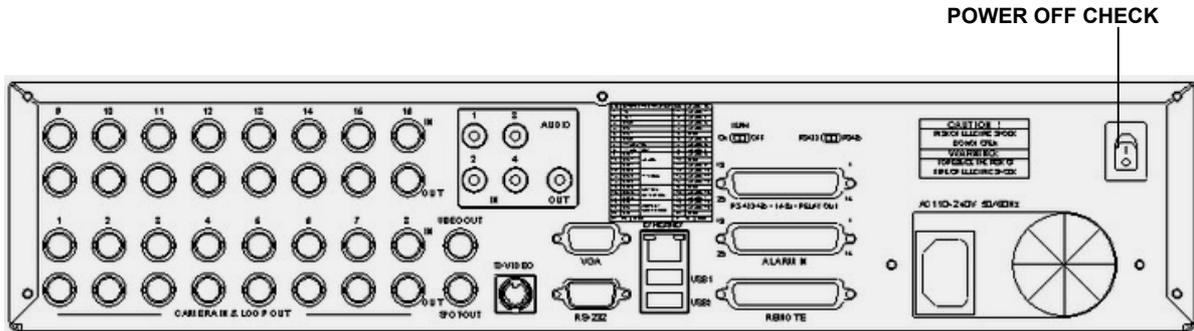

POWER OFF CHECK

At the SYSTEM menu,

Move the cursor to the PASSWORD using the ↑ , ↓ buttons.

Press the ENTER button when the cursor is on the PASSWORD and the following screen appears.

To exit this PASSWORD menu, press the ESC button.

6.5.3.1 MASTER PASSWORD

At the PASSWORD menu,

Move the cursor to the MASTER PASSWORD using the ↑ , ↓ buttons.

Press the ENTER button when the cursor is on the MASTER PASSWORD and the following screen appears.

Insert the current password in the eight digits marked ******** beside OLD PASSWORD using the CAMERA/ NUMBER INPUT buttons.

And then insert 8 numbers of NEW PASSWORD using the CAMERA/ NUMBER INPUT buttons.

And you have to insert the same numbers again to verify the password after entering the NEW PASSWORD.
To exit this MASTER PASSWORD menu, press the ESC button.

6.5.3.2 SUPERVISOR PASSWORD
At the PASSWORD menu,
Move the cursor to the SUPERVISOR PASSWORD using the ↑ , ↓ buttons.

Press the ENTER button when the cursor is on the SUPERVISOR PASSWORD and the following screen appears.

Insert the current password in the eight digits marked ******** beside OLD PASSWORD using the CAMERA/ NUMBER INPUT buttons.
And then insert 8 numbers of NEW PASSWORD using the CAMERA/ NUMBER INPUT buttons.
And you have to insert the same numbers again to verify the password after entering the NEW PASSWORD.
To exit this SUPERVISOR PASSWORD menu, press the ESC button.

NOTE: Supervisor can't change or setup the MENU
You can use only 0~9 number buttons to setup the PASSWORD.
Master 's default password is 11111111   Supervisor 's default password is 22222222.

6.5.3.3 MENU DISPLAY CHECK
At the PASSWORD menu,
Move the cursor to the MENU DISPLAY CHECK using the ↑ , ↓ buttons.
Select "ON" or "OFF" to set up the MENU DISPLAY CHECK using the (-), (+) buttons or wheel scroll of mouse.

If MENU DISPLAY CHECK is "ON", the password (only Master password is applicable) will be required when you display or set the MENU. The default is "OFF".

6.5.3.4 POWER OFF CHECK
At the PASSWORD menu,
Move the cursor to the POWER OFF CHECK using the ↑ , ↓ buttons.
Select "ON" or "OFF" to set up the POWER OFF CHECK using the (-), (+) buttons or wheel scroll of mouse.

If POWER OFF CHECK is "ON", the password will be required when the system power is turned off.
The default is "OFF".

6.5.3.5 REC/PLAY CHECK
At the PASSWORD menu,
   Move the cursor to the REC/PLAY CHECK using the ⬆ , ⬇ buttons.
   Select "ON" or "OFF" to set up the REC/PLAY CHECK using the (-), (+) buttons or wheel scroll of mouse.

> If REC/PLAY CHECK is "ON", the password will be required when you start/stop to record or playback.
> The default is "OFF".

6.5.4 VIDEO STANDARD

At the SYSTEM menu,
   Move the cursor to the VIDEO STANDARD using the ⬆ , ⬇ buttons.
   Select the desired value using the (-), (+) buttons or wheel scroll of mouse.

> If you select "AUTO", this DVR can detect NTSC/PAL automatically.
> The default is "AUTO".

6.5.5 LANGUAGE

At the SYSTEM menu,
   Move the cursor to the LANGUAGE using the ⬆ , ⬇ buttons.
Note: System has only English for user to select this time.

6.5.6 REMOTE CONTROL ID

At the SYSTEM menu,
   Move the cursor to the REMOTE CONTROL ID using the ⬆ , ⬇ buttons.
   Set the REMOTE CONTROL ID using the (-), (+) buttons or wheel scroll of mouse.

> If you are operating more than one DVR in the same place and wish to use the remote controller, the remote controller ID setup is required. Otherwise, do not change the default set value and "ON" should be selected.
>
> **Creates the Remote controller ID**
> Select one of the numbers from 11~14   21~24   31~34   41~44, and then press the same number button on the supplied remote controller before the operation.

6.5.7 KEY ECHO

At the SYSTEM menu,
   Move the cursor to the KEY ECHO using the ⬆ , ⬇ buttons.
   Set "ON" or "OFF" using the (-), (+) buttons or wheel scroll of mouse.

> ON   : The beep sounds when you press any buttons on the front panel.
> OFF : The beep does not sound.

6.5.8   DVR INITIALIZE

At the SYSTEM menu,
  Move the cursor to the DVR INITIALIZE using the ⬆ , ⬇ buttons.
  Press the ENTER button when the cursor is on the DVR INITIALIZE and the following screen appears.

  If you want to initialize, move the cursor to "YES" and then press the ENTER button. If not, move the cursor to "NO" and then press the ENTER button. Use the ⬆ , ⬇ buttons to move the cursor.
  To exit this DVR INITIALIZE screen, press the ESC button.

6.5.9   FIRMWARE UPGRADE

At the SYSTEM menu,
  Move the cursor to the FIRMWARE UPGRADE using the ⬆ , ⬇ buttons.
  Press the ENTER button when the cursor is on the FIRMWARE UPGRADE and the following screen appears.

  If you want to update firmware using the USB_FRONT port, move the cursor to "YES" and then press the ENTER button. If not, move the cursor to "NO" and then press the ENTER button.
  Use the ⬆ , ⬇ buttons to move the cursor.
  To exit this FIRMWARE UPGRADE screen, press the ESC button.

  NOTE: It is possible to upload the menu setting only with a front USB port.

MENU SETUP

6.6 LINK

To set up the LINK menu,
    Move the cursor to the LINK icon using the ◀ , ▶ in the MENU screen.
    Press the ENTER button when the cursor is on the LINK icon and the following items appear.

6.6.1 NETWORK

At the LINK menu,
    Move the cursor to the NETWORK using the ▲ , ▼ buttons.
    Press the ENTER button when the cursor is on the NETWORK and the following screen appears.

    To exit this NETWORK menu, press the ESC button.

<Fixed IP>
6.6.1.1 DHCP
At the NETWORK menu,
    Move the cursor to the DHCP using the ▲ , ▼ buttons.
    Select "OFF" using the (-), (+) buttons or wheel scroll of mouse.

6.6.1.2 IP ADDRESS
At the NETWORK menu,
  Move the cursor to the IP ADDRESS using the ↑ , ↓ buttons.
  Select the desired position using the ← , ➡ buttons and set the data value using the (-), (+) buttons or wheel scroll of mouse.

6.6.1.3 SUBNET MASK
At the NETWORK menu,
  Move the cursor to the SUBNET MASK using the ↑ , ↓ buttons.
  Select the desired position using the ← , ➡ buttons and set the data value using the (-), (+) buttons or wheel scroll of mouse.

6.6.1.4 GATEWAY
At the NETWORK menu,
  Move the cursor to the GATEWAY using the ↑ , ↓ buttons.
  Select the desired position using the ← , ➡ buttons and set the data value using the (-), (+) buttons or wheel scroll of mouse.

6.6.1.5 DNS
At the NETWORK menu,
  Move the cursor to the DNS using the ↑ , ↓ buttons.
  Select the desired position using the ← , ➡ buttons and set the data value using the (-), (+) buttons or wheel scroll of mouse.

6.6.1.6 PORT
At the NETWORK menu,
  Move the cursor to the PORT using the ↑ , ↓ buttons.
  Select the desired position using the ← , ➡ buttons and set the data value using the (-), (+) buttons or wheel scroll of mouse.

> **NOTE:** Port setting on DVR and client viewer software must be matched.

<Dynamic IP>
At the NETWORK menu,
  Move the cursor to the DHCP using the ↑ , ↓ buttons.
  Select "ON" using the (-), (+) buttons or wheel scroll of mouse.
  Move the cursor to the DYNAMIC SVR using the ↑ , ↓ buttons.
 Input the dynamic server IP using the (-), (+) buttons or wheel scroll of mouse to change the value and
  the ↑ , ↓ buttons to move the cursor.

> **NOTE:** DHCP is a protocol for assigning dynamic IP addresses to devices on a network.
> ** You have to connect with Router in case of using a network of PPPOE type because this unit doesn't have a PPPOE protocol.

** Please refer to the below image in case of a PPPOE type
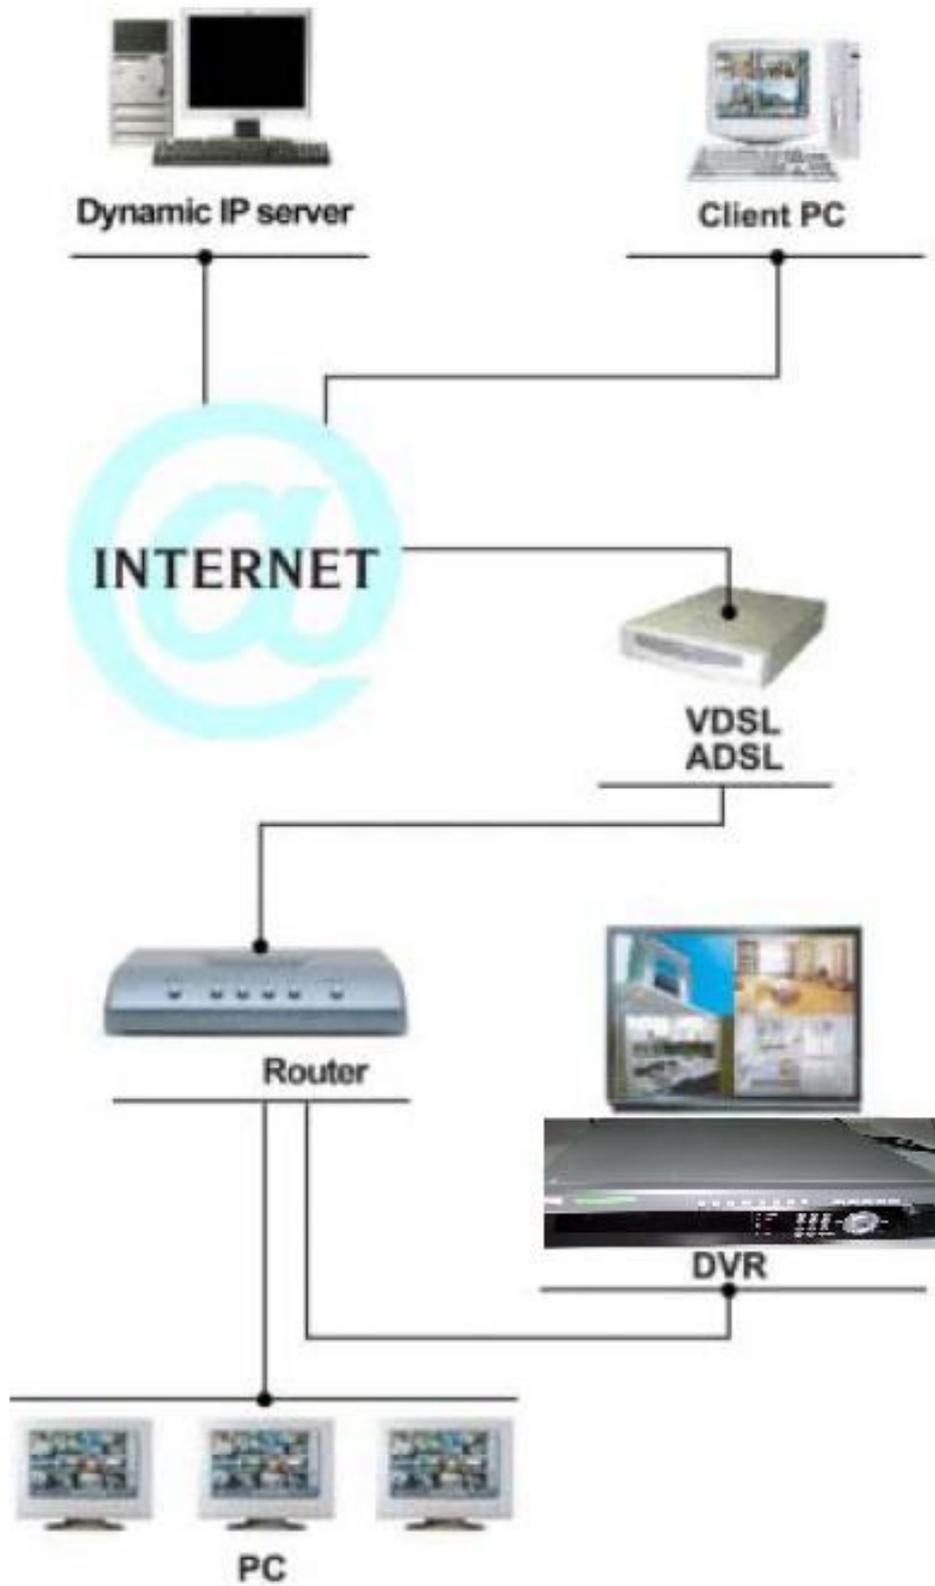

6.6.2 RS-232

At the LINK menu,
   Move the cursor to the RS-232 using the ⬆ , ⬇ buttons.
   Press the ENTER button when the cursor is on the RS-232 and the following screen appears.

   Use the ⬆ , ⬇ buttons to choose the item and use the (-), (+) buttons or wheel scroll of mouse to set the data value.
   To exit this RS-232 menu, press the ESC button.

6.6.3 RS-422/485

At the LINK menu,
   Move the cursor to the RS-422/485 using the ⬆ , ⬇ buttons.
   Press the ENTER button when the cursor is on the RS-422/485 and the following screen appears.

   Use the ⬆ , ⬇ buttons to choose the item and use the (-), (+) buttons or wheel scroll of mouse to set the data value.
   To exit this RS-422/485 menu, press the ESC button.

NOTE
BAUD RATE : Data transmission speed per second.
DATA BIT : Data transmission bit.
PARITY BIT : Data transmission error checking.
STOP BIT : Data transmission ending bit

 # CAUTION:
Turn off the power not to damage this unit when you connect RS-232 connector.

6.6.4   PTZ

At the LINK menu,
Move the cursor to the PTZ using ⬆ , ⬇ buttons.
Press the ENTER button when the cursor is on the PTZ and the following 2 pages screen appears.

Select the desired channel using ⬆ , ⬇ buttons.
Use the (-), (+) buttons or wheel scroll of mouse to select the right model of installed PTZ camera.
Press the ➡ button to set up a ID of the PTZ camera.
Use the (-), (+) buttons or wheel scroll of mouse to select the desired ID.
Press the ⬅ button to see the next page.
To exit this PTZ menu, press the ESC button.

6.6.5   E-mail

At the LINK menu,
Move the cursor to the E-mail using ⬆ , ⬇ buttons.
Press the ENTER button when the cursor is on the E-mail and the following pages screen appears.

6.6.5.1 SEND E-MAIL
At the E-MAIL menu,
Move the cursor to the SEND E-MAIL using the ↟ , ↡ buttons and select "ON" using the (-), (+) buttons to send a e-mail when an event happened.

6.6.5.2 SMTP SERVER
At the E-MAIL menu,
  Move the cursor to the SMTP SERVER using the ↟ , ↡ buttons to input the e-mail sever address to be used by DVR.
  Press the ENTER button and the following screen appears.

  Select the character using the ↟ , ↡ , ⬅ , ➡ buttons and then press the ENTER button.
  To exit this CHARACTER TABLE screen, press the ESC button.

6.6.5.3 USER ID
At the E-MAIL menu,
  Move the cursor to the USER ID using the , buttons to input the e-mail account to be used by DVR.
  Press the ENTER button and the following screen appears.

  Select the character using the ↟ , ↡ , ⬅ , ➡ buttons and then press the ENTER button.
  To exit this CHARACTER TABLE screen, press the ESC button.

6.6.5.4 PASSWORD
At the E-MAIL menu,
Move the cursor to the PASSWORD using the ↑ , ↓ buttons to input the account password to be used by DVR.
Press the ENTER button and the following screen appears.

Select the character using the ↑ , ↓ , ← , ➡ buttons and then press the ENTER button.
To exit this CHARACTER TABLE screen, press the ESC button.

6.6.5.5 DVR E-MAIL ADDR
At the E-MAIL menu,
Move the cursor to the DVR E-MAIL ADDR using the ↑ , ↓ buttons to input the e-mail address to receive the e-mail when an event happened.
Press the ENTER button and the following screen appears.

Select the character using the ↑ , ↓ , ← , ➡ buttons and then press the ENTER button.
To exit this CHARACTER TABLE screen, press the ESC button

6.7   SEARCH

To set up the SEARCH menu,
Move the cursor to the SEARCH icon using the ◀ , ➡ in the MENU screen.
Press the ENTER button when the cursor is on the SEARCH icon and the following items appear.

** Please, refer to Search & Playback of Chapter 5 Operation.

6.8   COPY

To set up the COPY menu,
Move the cursor to the COPY icon using the ◀ , ➡ in the MENU screen.
Press the ENTER button when the cursor is on the COPY icon and the following items appear.
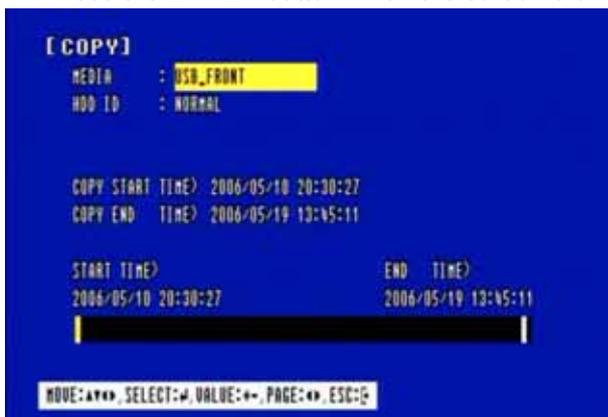

** Please, refer to Copy of Chapter 5 Operation.

6.9 EXIT

At the MENU screen,
　　Move the cursor to the EXIT icon using the ← , → buttons.
　　Press the ENTER button when the cursor is on the EXIT icon and the following items appear.

　　Move the cursor to the desired item using the ↑ , ↓ buttons and press the ENTER button.
　　- 　SAVE ONLY : Select this item if you want only to save the changed setup.
　　- 　SAVE AND EXIT : Select this item if you want to save the changed setup and exit this screen.
　　- 　EXIT WITHOUT SAVE : Select this item if you want not to save the changed setup before
　　　　exiting this screen.

Chapter 7 External Terminal Information

7.1 RS-422/485

This port can be used to connect the external controller.

Chapter 8   Specifications

1. VIDEO		
Input Level		1.0 Vp-p±10% Composite, 75Ω Balanced
Video Standard		NTSC(525 lines)/ PAL(625 lines)/ AUTO
Display Speed	NTSC	480/ 240/120 (16/ 8/ 4CH Real Time)
	PAL	400/ 200/100 fps (16/ 8/ 4CH Real Time)
Display Resolution	NTSC	720(H) X 480(V)
	PAL	720(H) X 576(V)
Monitor Output	Main	1.0Vp-p Composite, 75Ω Balanced (YC Output)
	Spot	1.0Vp-p Composite, 75Ω Balanced
	VGA	Analogue non-interlaced RGB. This DVR is compatible with TFT LCD monitor that support 50Hz VGA mode in PAL

2. AUDIO		
LINE Input Level		0.5~1.4Vp-p@20kΩ
Output Level		-10dB 1KΩ

3. RECORDING		
*[1] Compression Method		Motion JPEG (MJPEG)/ MPEG4 (Refer to the below table)
*[2] Recording speed		Refer to the below table
Quality	User Define	Low/ Fine/ Superfine
Scheduling		Available per hour/ each channel
Mode		Manual/ Event(Motion detection, Video loss, Sensor)/ Schedule
Water Marking		Support

4. HDD		
Capacity	Internal Storage	1 Removable HDD(option) + 4 HDDs
	External Storage	40 HDDs (10 HDDs in an external bay x 4) (option)
Speed		Min. 5400RPM, 7200RPM
DMA		45MHz DMA
Type		EIDE compatible
Seek time		Faster than 9.0ms avg.
External Bay Interface		USB 2.0

5. ALARM		
Sensor Input		16/ 8/4CH (DSUB-25)
Alarm Output		4 Relay out (Programmable), DSUB-25
Motion Detection		Available per each camera/ Multi-detection level

6. CONNECTORS		
Video Input	Main	BNC 16/ 8/4ports
Loop Output		BNC 16/ 8/4ports
Monitor Output	Main	BNC 1 port
	Spot	BNC 1 port
	S-Video	BNC 1 port (4 pins mini DIN)
	VGA	BNC 1 port (15 pins female DSUB)
Audio Input		RCA 4 CH : Rear 4 port
Audio Output		RCA 1 CH : Rear 1 port
USB 2.0		HDD extension/ Mouse/ USB memory stick/ CD-RW/ DVD-RW (Front 1 port, Rear 2 ports)

Remote		Reserved
Serial		External control (RS-232C) / For debugging : 9 pins male DSUB
PTZ control		RS-485
Alarm Input		16/ 8/4CH
Alarm Output		4 Relay output : 3 pins terminal block (Normal-Open, Normal-Close, Common) x 4
Ethernet		RJ45 connector, 10/100 Mbps
7. ELECTRICAL		
Power Source		110~220VAC (50~60Hz) : Auto-detection
Power Consumption		App. 70W(Including 1 HDD)
8. ENVIRONMENTAL		
Operating Temperature		5 ~ + 40
Storage Temperature		-10 ~ + 60
Humidity		30 ~ 90%RH (non-condensing)
9. PHYSICAL		
Construction		iron case + front plastic panel
Color		Silver
Dimension		420(W) x 88(H) x 410(D) mm
Weight		App. 8kg (Not Including HDD)
10. BACKUP & COPY		
Digital Backup		Event Backup/ Mirroring
Copy		External HDD/ CD-RW/ DVD-RW/ USB Stick (2.0)
11. SEARCHING & PLAYBACK		
Searching Method		Time/ Event/ File/ Bookmark/ Log file
12. MULTI-REMOTE SURVEILLANCE		
Monitoring Environment		Client software/ Central monitoring system/ Web
Max. connection DVR		16 DVRs accessible
Max. client		Supporting multi-client (16 clients accessible)
13. SYSTEM MONITORING & RECOVERY		
System logging		Power failure checkable
Monitoring		2 independent Watchdog (Reliable Hardware Watchdog + Software Watchdog)
Recovery		Auto-Reboot by Watchdog/ Automatic database recovery
14. Others		
OS		Embedded Linux
Duplexer or Triplexer		Triplexer
Control Device		Front key/ Mouse/ Network viewer
File compatibility with PC (Windows)		Compatible
Number of event list/ Log file list		20,000/ 20,000

< Recording Speed Table >

Unit : fps

Model			16-CH DVR	8-CH DVR	4-CH DVR
Recording Speed	NTSC	360 x 240	120	120	120
		720 x 240	60	60	60
		720 x 480	30	30	30
	PAL	360 x 288	100	100	100
		720 x 288	50	50	50
		720 x 576	25	25	25
Compression Method			MPEG4	MPEG4	MPEG4

< Recording Time Table >

1. RECORDING CONDITIONS

Based on 120GB of storage with the installation of 1 camera.
This DVR can support up to 22TB with external HDD storage devices..

2. RECORDING TIME TABLE

VIDEO SIGNAL	RECORD IMAGE	IMAGE QUALITY	IMAGE SIZE	120fps(CIF)	60fps(CIF)	30fps(CIF)	15fps(CIF)
NTSC*	Color Bar	SUPERFINE	8448 Bytes	69 Hours	138 Hours	276 Hours	552 Hours
		FINE	6688 Bytes	85 Hours	170 Hours	340 Hours	680 Hours
		LOW	5344 Bytes	111 Hours	222 Hours	444 Hours	888 Hours
	Cross Hatch	SUPERFINE	37300 Bytes	15 Hours	30 Hours	60 Hours	120 Hours
		FINE	29400 Bytes	19 Hours	38 Hours	76 Hours	152 Hours
		LOW	22208 Bytes	25 Hours	50 Hours	100 Hours	200 Hours

The NTSC signal mode is used for most of televisions produced in the U.S.

• The figures in the Recording Time Table were estimated under ideal recording conditions and may vary from your actual recording situation.
• In the Recording Time Table, multiply by 2 for recording hours with an 240 GB HDD and 3 for recording hours with a 360 GB HDD.
• The complexity of the image and the amount of motion recorded greatly influences the recording capacity of your hard drive (HDD). The higher the frames per second and the higher the video quality setting, the lower your HDD recording capacity will be. In the same manner, the lower the frames per second setting and the lower the video quality setting, the higher your HDD recording capacity will be.
• Note that the lower frame rate does not mean a lower video quality. The image quality remains the same whether the frames per second setting is set high or low. One frame per second is the same as taking a photo every second.
• There are several factors that influence the recording capacity of your hard drive.
  (a) The number of cameras used
  (b) The complexity of the recording image
  (c) The number of frame recorded per second
  (d) The image quality setting – Superfine, Fine or Low

8.1   INSTALL the INTERNAL HARD DISK DRIVE(s).

Note:
(Set the master or slave of HDD before fixing the HDD(s) into DVR. Refer to HDD jumper setting information.)
Note: Set up no. 1 and 3 by master and no. 2 and 4 by slave.

PCI SLOT	Description	Jumper Setting
A	For Removable HDD (Optional)	Master
B	For Fixed HDD (1 and 2)	No.1 for Master and No.2 for Slave
C	For Fixed HDD (3 and 4)	No.3 for Master and No.4 for Slave

When installing the HDD, format it before operation (It is suggested, once the HDD has been installed, unless necessary, do not replace the HDD).

HDD Jumper Setting Information

Before install the Hard Disk Drive(s), please read the jumper setting information on the label. If the jumper is not set properly, the system will be disordered. Jumper setting is different according to HDD model.

Please visit following web sites of Hard Disk Drive manufacturer for more information about jumper setting.

Chapter 9 Network Viewer

9.1 INSTALLATION of NETWORK VIEWER SOFTWARE

9.1.1 System requirement
- Pentium III or above recommended
- *O/S : Microsoft Windows 2000 / XP*
- *128MB RAM or above recommended*
- *Super VGA 16M or above recommended*
- 10/100 base T network card for LAN operation

9.1.2 Network Environment

	Client PC	DVR
Minimum	More than 1Mbps	More than 0.5Mbps
Recommended (16 Frames/Sec)	More than 3Mbps	More than 3Mbps

∗ Transfer rate of image varies with the number of client accessed to DVR.

NOTE : The software, Dvrviewer® is compatible with Microsoft Windows 2000 / XP.

9.1.3 Installation
To start the installation,
1. Start Windows 2000 or XP
2. Insert Dvrviewer Software CD into the CD-ROM drive
3. Install Dvrviewer and locate the Dvrviewer.exe file on your PC screen.
4. Simply double-click the icon to start.
5. Dvrviewer main menu controller will appear on the screen.

9.2 CONNECTING to DVR

Please double-click the icon of Dvrviewer, and then the following main menu controller will appear on the PC screen.
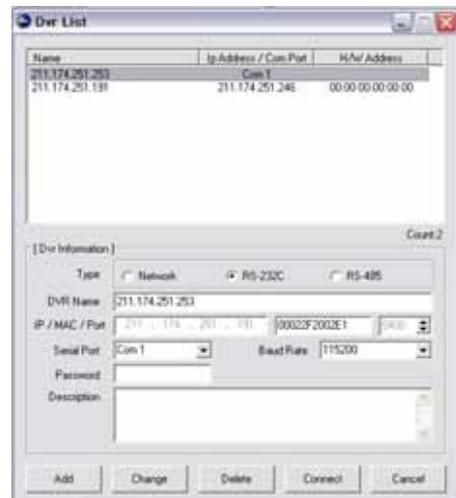

9.2.1   ADD a NEW SITE INFORMATION
1 Click the "Select a DVR" button to display the DVR List on the screen.
2 Fill out Type, DVR Name, IP address and Password to add the desired units into the DVR information box, and then click on the "Add" button to save the information.

9.2.2   CHANGE the SITE INFORMATION
1 In case of any changes, type new information into the box after selecting the desired DVR on the list.
2 Click the "Change" button to save the changes.

9.2.3   DELETE the SITE INFORMATION
1 Select the desired DVR on the list, and then click the "Delete" button to erase the information on the list.

9.2.4   CONNECT to a DVR.
1 Select the desired DVR that you want to connect in the "DVR list".
2 Select the necessary Information according to the connection type.
3 Click the "Connect" button or to access the DVR and the images screen will be displayed.

> **NOTE**
> You can connect 16 x 16(16 users x 16 units) windows at the same time but Master viewer is only one by user.
> **PASSWORD**
> - The default password is either of 11111111(Master password) and 22222222(Supervisor password).
> - To change the password, please refer to the **PASSWORD** setup in Chapter 6 Set up MENU.
> - The password must be the same as the registered site password.

9.2.5   VIEWER SCREEN
1 Click the [   ] button to see the full view window with control bar.

2 Alarm Status
3 LIVE
4 Playback

9.3   DVR SEARCH

This menu allows you to detect all the units on the local network.
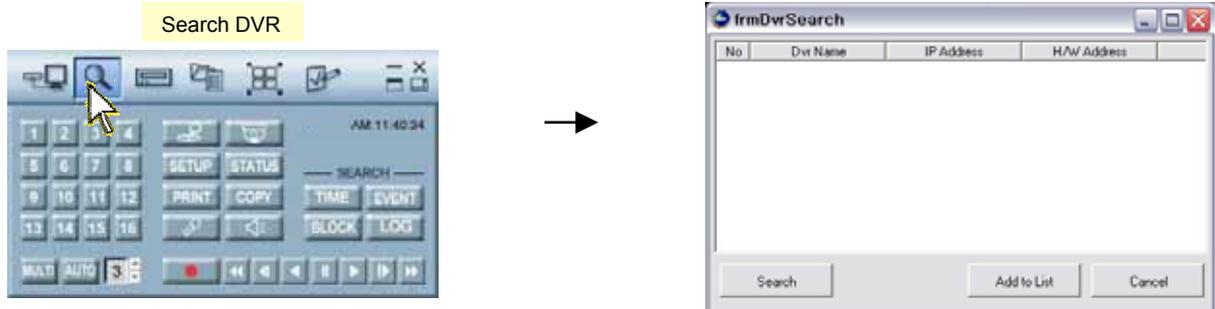

1   Click "Search DVR" button to display the "Search" menu window.
2   Click the "Search" button, and then all the units on the local network will be detected and listed on the screen.
3   Click the desired unit, and then click the "Add to list" button to add the unit into the "DVR list".

9.4   HDD SEARCH

Connect DVR's HDD with local PC, and then please double-click the Dvrviewer icon and the main menu controller will appear on the PC screen.
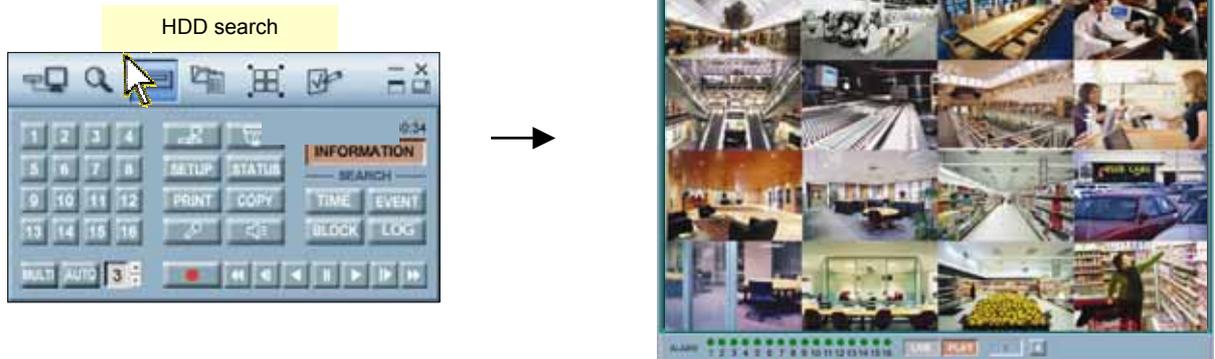

1   Click the "HDD search" button and the view screen of HDD detected will appear on the PC screen.
2   Click the desired one of the "SEARCH" buttons and SEARCH window will appear on the PC screen.
3   Click the Play button after select of the desired Channel and Search Time in Time Search window.
4   Click the Search button after select of the desired Channel, Event type and Search Time in Event Search window and then click the Play button after select of the desired list.
    If you want to see the next list, click the Next button before playing.
5   Click the Search button after input of the desired Search Time in Block Search window and then click the Play button after select of the desired list.
    If you want to see the next list, click the Next button before playing.

NOTE
- You can directly install the removable HDD rack from DVR to PC if compatible rack guide is installed on the PC. In this case, please check the jumper setting for proper operation.
- You can also simply use external IEEE1394 HDD reader.
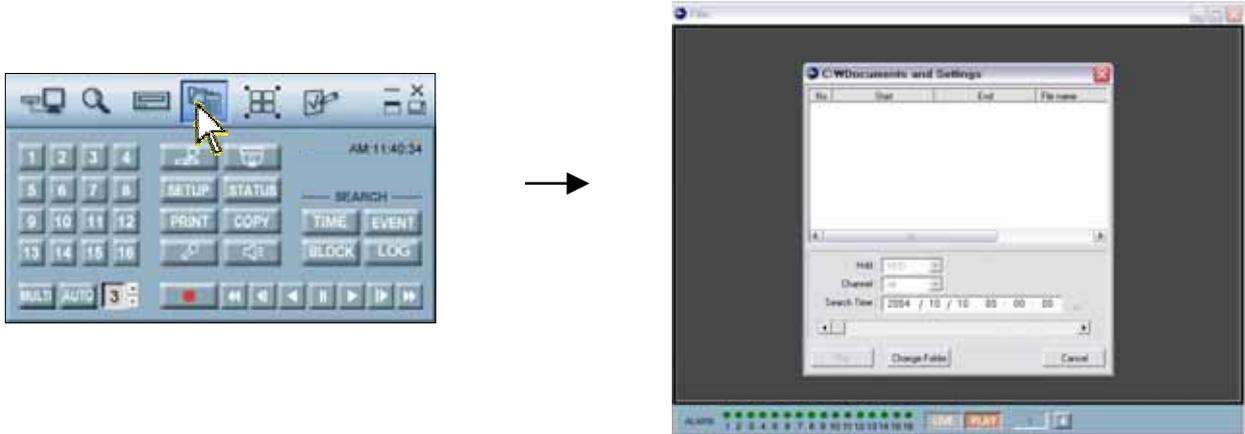

9.5   FILE SEARCH

At the above main menu controller,

1   Click the "File Search" button and the "File list" window will appear on the PC screen.
2   If you want to search images saved in CD-RW, DVD-RW or PC, insert the CD or DVD into your PC and click the "File Search" button and the File Search window will appear.
3   Click the "Folder Select" button and then select the desired folder and then click the "OK" button.
4   Select the desired list and then click the "Play" button.

9.6   ARRANGE the SCREEN

Use this button when you want to arrange the view screens.

Shown above is the main menu controller,

1   Click the "Arrange" button when you access more than one DVR and the windows are arranged in a grid on your PC screen.

* 1 site windows

* 2 ~ 4 site windows

*5 ~ 9 site windows

*10~16 site windows

> **NOTE** - You can connect up to 16 DVRs with your PC simultaneously.
>   (16 users x 16 units: Master connection is only one.)
>   - With the windows arranged in a grid, double-click the desired to make it the full screen

9.7   OPTION

Insert the CD into the CD-ROM drive, and then please double-click the icon of Dvrviewer and the following main menu controller will appear on the PC screen.

→
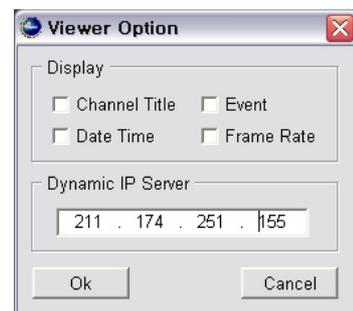

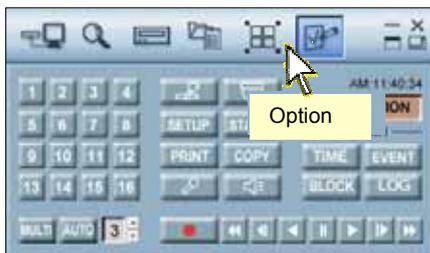

1 Click the "Option" button to change the other MENU setups.
2 Check the desired Option and then click the OK button.
  - Channel Title: If you check "Channel Title", the title of each channel will be displayed on the viewer screen.
  - Event: If you check "Event", red OSD will be indicated on the event channel screen when any event detected.
  - Date Time: If you check "Date Time", OSD of date and time will be displayed on the viewer screen.
  - Frame Rate: If you check "Frame Rate", transmitted frame rate will be displayed on the under bar of viewer screen.

9.8   CONTROL

9.8.1   Screen Display
Images can be viewed in a full or multi format on each screen.

a. Full screen display
- Click the desired channel button and the full screen of the channel will be displayed.

b. Multi-screen display
1 Click the "MULTI" button and the multi-screen will be displayed.
2 Click the "MULTI" button again to view other multi-screen.

> **NOTE**
> Selecting a Multi-display may slow down the updates as multiple connections are made to the DVR at the same time.

c. Auto Sequence display
1 Click the "AUTO" button to view the full screen in sequence.
2 Change the interval time using the ▲,▼ buttons.
3 Click the "AUTO" button again to exit this mode.

9.8.2   Controller
Click the "Controller" button and the control keys same as front panel of DVR will be displayed.

> **NOTE**
> If you need some more information about the control keys, please refer to Chapter 5 Operation.

9.8.3 PTZ
This menu allows you to control the PTZ camera through the network.
1 Click the "PTZ" button to display the following PTZ controller.
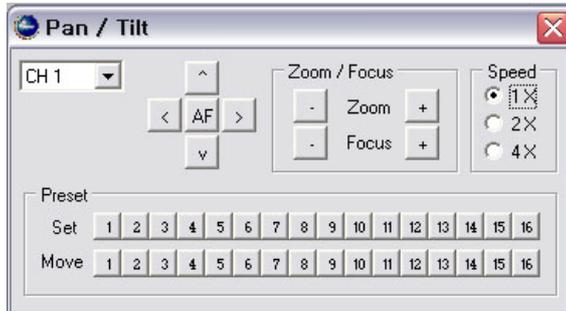

2 Click the `^` and `v` button to tilt up or down.
3 Click the `<` and `>` button to pan left or right.
4 Click the "ZOOM(- or +)" button to zoom in or out.
5 Click the "FOCUS(- or +)" button to obtain the clearest picture.
6 And then select the speed.

> **NOTE**
> You can enter the PTZ mode only while connecting the PTZ camera.

- Preset setup
A preset is user-defined camera position using pan and tilt, zoom, and focus commands. The DVR has programming capacity for 16 preset locations.

- Program a preset
1 Move the camera to a desired position using the PTZ control buttons.
2 After setting the PTZ camera, click one of the desired "Set" buttons, 1~16 of Preset.
3 To continue setting the preset camera, click another "Set" button after 1 . (Repeat 1 and 2)

- Move to a preset
1 Click one of the "Move" buttons to move to the desired setting.
2 The camera will move to the programmed preset position.

9.8.4 SETUP
You can modify DVR MENU setup through the network.
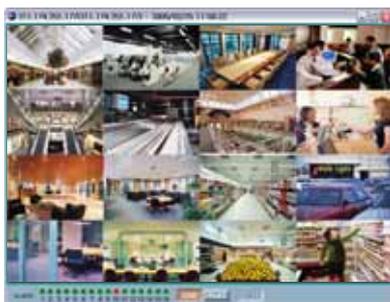

1. Click the "SETUP" button on the control menu bar to display the DVR setup screen after connecting the view screen. (It is possible only for master connection.)
2. Click the "Save to file" button to store the current setup values.
3. Click the "Read from file" button to reload the stored setup values.
4. Click the "Load from DVR" button to call the current setup values from connected DVR.
5. Once the setup values are modified, click the "Update to DVR" button to update those values into the DVR.

9.8.4.1 How to download firmware
1. Click the "SETUP" button on the control menu bar to display the DVR setup screen after connecting the view screen. (It is possible only for master connection.)
2. Click the DOWNLOAD tap and you can see the "Firmware Download" button.
3. Click this "Firmware Download" button and browser window to find the desired file will be displayed.
4. Select the downloading file and click the "OPEN" button to download.

NOTE
Please refer to Chapter 6 MENU setup for more information about DVR menu setup.

9.8.5 STATUS

1. Click the "STATUS" button on the control menu bar to display the DVR status after connecting the view screen.

9.8.6 PRINT

After connecting the view screen,
1 Click the "PRINT" button on the control menu bar to print the desired image.
2 And the preview window will be displayed as the above picture.
3 Set up the desired option and then click the Print button of the preview window.

9.8.7 COPY
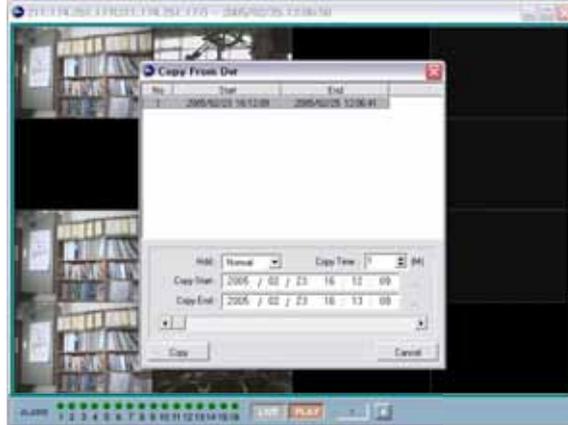

After connecting the view screen,
1 Click the "COPY" button on the control menu bar to copy the desired image.
2 The Copy control window will appear.
3 Click the "Copy" button of the control window after setting the desired HDD and the time.

 The copying percentage (%) is shown on the status bar.

9.8.8 AUDIO IN

After connecting the view screen,
1 Click the "Audio In" button on the control menu bar to input the audio.
2 Sound of your PC will travel into the DVR.

9.8.9 AUDIO OUT

After connecting the view screen,
1 Click the "Audio Out" button on the control menu bar to output the audio.

2   You can hear the DVR sound from the speaker of your PC.

9.8.10   TIME SEARCH
You can search and playback the images by the time.
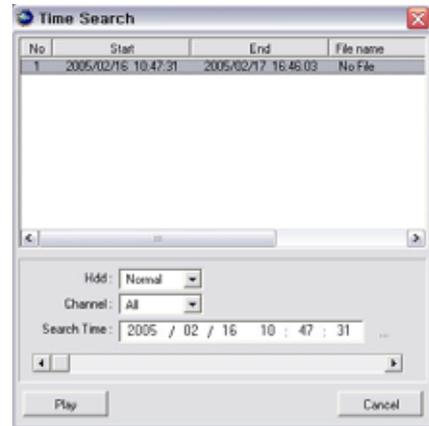

After connecting the view screen,
1   Click the "TIME" button on the control menu bar to display the Time Search window.
2   Select the desired HDD mode in the HDD dropdown list, and then click the "Search" button.
3   When the recorded time information appears, select the desired "HDD" and the "Channel" and set the "Search Time" for playback.
4   Click the "Play" button to display the images on the screen.

9.8.11   EVENT SEARCH
You can review the event list that was triggered on the DVR.

After connecting the view screen,
1   Click the "EVENT" button on the control menu bar to display the Event Search window.
2   Select the desired HDD mode, Channel and the Event type in Event Search window, and then set the Search Time
3   And then click the "Search" button.
4   When the recorded event list appears, select the desired list.
5   Click the "Play" button to display the images on the screen.

9.8.12 BLOCK SEARCH
You can search and playback the images by the block.

After connecting the view screen,
1 Click the "BLOCK" button on the control menu bar to display the Block Search window.
2 Select the desired HDD mode and set the Search Time, and then click the "Search" button.
3 When the list appears, select the desired list.
4 Click the "Play" button of Block Search window to display the images on the screen.
5 Click the "Next" button to search the next list.

9.8.13 LOG SEARCH
You can search and playback the images by logging.
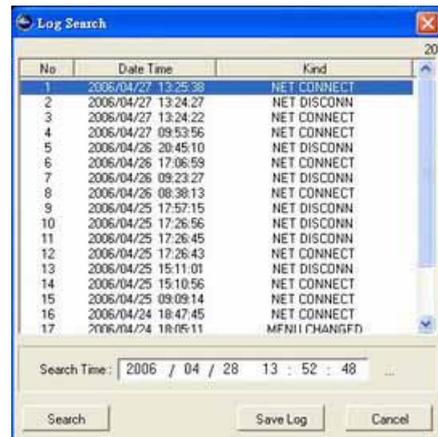

1 Click the "LOG" button on the control menu bar to display   the
   Log Search window.
2 Set the Search Time, and then click the **Search** button.
3 Click the "Next" button to search the next list.

> **NOTE:** When the DVR is in Setup mode, this search function will not be performed.
> - Normal HDD: Hard Disk Drive installed in the DVR
> - Backup HDD: Hard Disk Drive installed in the DVR to backup(Event backup or Mirroring).
> - R-HDD: Removable Hard Disk Drive installed in the DVR

9.9   KEY INFORMATION

9.9.1   PAUSE

1   Click this button to pause the images during the playback or live.

9.9.2   PLAY   (Reverse & Forward)

1   Use these buttons to playback images at normal speed in either direction.

9.9.3   FAST (Reverse & Forward)

1   Use these buttons to playback images faster than normal speed in either direction.
2   Multiple clicks of these buttons will increase the fast forward & the reverse speed.
3   Various fast speed from x2 up to x128.

9.9.4   SLOW (Reverse & Forward)

1   Use these buttons to playback images faster than normal speed in either direction.
2   Multiple clicks of these buttons will decrease the fast forward & the reverse speed.
3   Various slow speed from x2 up to x128.

9.9.5   RECORD

1   To store the still image of a channel into the remote site PC, click this Record button.
2   Click the Record button again to stop recording.
3   The images will be stored in the save folder of your PC (Saved in the "save" folder under directory "Dvrviewer" (…/ Dvrviewer/ save)).
4   Click the FILE Search button to find the saved images (Please refer to 9.5 File Search, page 90).
- During the playback mode, click the LIVE button to convert the screen into the live display mode.
- You must use this Dvrviewer to replay the stored images in the PC.
